SPECIFICATIONS

Specifications

- **General**

Power Source:

E/ EG areas:	**AC 230V, 50Hz**
EB area:	**AC 230V-240V, 50Hz**
Power consumption:	**115 W**
Dimensions (W×H×D):	**430×60×354 mm**
Mass:	**3.35kg**

- **Amplifier section**

RMS Output Power: Dolby Digital Mode

- **Total RMS Dolby Digital mode Power:** **850 W**

At 1kHz and total harmonic of 10%

Front:	**110 W/ Channel (3 Ω)**
Center:	**225 W/ Channel (6 Ω)**
Surround:	**90 W/ Channel (4 Ω)**

At 100Hz and total harmonic of 10%

Active subwoofers:	**225 W/ Channel (6 Ω)**

DIN Output Power: Dolby Digital Mode:

- **Total DIN Dolby Digital mode Power:** **440 W**

At 1kHz and total harmonic of 1%

Front:	**80 W/ Channel (3 Ω)**
Center:	**75 W/ Channel (6 Ω)**
Surround:	**65 W/ Channel (4 Ω)**

At 100Hz and total harmonic of 1%

Subwoofer:	**75 W/ Channel (6 Ω)**

- **FM tuner section**

Preset Memory:	**FM 15 stations** **AM/MW 15 stations**
Frequency Range:	**87.50-108.00MHz** **(50kHz in step)**
Sensitivity:	**1.8 μ V (IHF)**
S/N 26dB	**1.4 μ V**
Antenna Terminals:	**75 Ω (unbalanced)**

- **AM tuner section**

Frequency Range:	**522-1629kHz (9kHz in step)**
AM Sensitivity S/N 20dB at 999kHz:	**560 μ V/m**

- **Digital audio input:**

Optical digital input:	**Optical terminal (1 system)**
Sampling frequency:	**32kHz, 44.1kHz, 48kHz**

- **Phone Jack:**

Terminal:	**Stereo 3.5 mm jack**

- **Front M. Port:**

Sensitivity:	**100mV (15k Ω)**

Terminal: **Stereo 3.5 mm jack**

- **Disc section**

Discs played (8 cm or 12 cm):

(1) **DVD [DVD-Video, DVD-Audio, DivX(*1,2)]**

(2) **DVD-RAM [DVD-VR, MP3(*2,6), JPEG(*2,3), MPEG4(*2,4), DivX(*1,2)]**

(3) **DVD-R [DVD-Video, DVD-VR, MP3(*2,6), JPEG(*2,3), MPEG4(*2,4), DivX(*1,2)]**

(4) **DVD-R DL [DVD-Video, DVD-VR]**

(5) **DVD-RW [DVD-Video, DVD-VR, MP3(*2,6), JPEG(*2,3), MPEG4(*2,4), DivX(*1,2)]**

(6) **+R/+RW [Video]**

(7) **+R DL [Video]**

(8) **CD, CD-R/RW [CD-DA, Video CD, SVCD(*5), MP3(*2,6), WMA(*2,7), JPEG(*2,3), MPEG4(*2,4), DivX (*1,2), HighMAT Level 2 (Audio and Image)]**

***1** **Plays all versions of DivX ® video (including DivX ® 6) with standard playback of DivX ® media files. Certified to the DivX Home Theater Profile.**

- **GMC (Global Motion Compensation) is not supported.**

***2** **The total combined maximum number of recognizable audio, picture and video contents and groups: 4000 audio, picture and video contents and 400 groups.**

***3** **Exif Ver 2.1 JPEG Baseline files**

- **Picture resolution: between 160 x 120 and 6144 x 4096 pixels (Sub sampling is 4:0:0, 4:2:0, 4:2:2, 4:4:4). Extremely long and narrow pictures may not be displayed.**

***4** **MPEG4 data recorded with Panasonic SD multi cameras or DVD video recorders.**

- **Conforming to SD VIDEO specifications (ASF standard)/ MPEG4 (Simple Profile) video system/G.726 audio system.**

***5** **Conforming to IEC62107**

***6** **MPEG-1 Layer 3, MPEG-2 Layer 3**

***7** **Windows Media Audio Ver.9.0 L3**

- **Not compatible with Multiple Bit Rate (MBR)**

Pick up:

Wavelength:

- **CD:** **785nm**
- **DVD:** **662nm**

Laser power:

- **CD:** **CLASS 1M**
- **DVD:** **CLASS 1**

Audio output (DISC):

Number of channels: **5.1 ch (FL, FR, C, SL, SR, SW)**

Audio performance:

Frequency response:

DVD (linear audio): **4 Hz-22 kHz (48 kHz sampling)**

	4 Hz-44 kHz (96 kHz sampling)
DVD-Audio:	4 Hz-88 kHz (192 kHz sampling)
CD-Audio:	4 Hz-20 kHz
S/N ratio:	
CD-Audio:	105 dB
Dynamic range:	
DVD (linear audio):	95 dB
CD-Audio:	95 dB
Total harmonic distortion:	
CD-Audio:	0.005 %

● Video section

Video system:	
Signal system:	PAL 625/50, PAL 525/60, NTSC
Composite video output:	
Output level:	1 Vp-p (75 Ω)
Terminal:	Pin jack (1 system)
	Scart jack (1 system)
S-video output:	
Y output level:	1 Vp-p (75 Ω)
C output level:	PAL; 0.3Vp-p (75 Ω)
	NTSC; 0.286 Vp-p (75 Ω)
Terminal	S terminal (1 system)
	Scart jack (1 system)
Component video output (NTSC: 480p/480i, PAL: 576p/576i):	
Y output level:	1 Vp-p (75 Ω)
PB output level:	0.7 Vp-p (75 Ω)
PR output level:	0.7 Vp-p (75 Ω)
Terminal:	Pin jack (Y: green, PB: blue, PR: red) (1 system)
RGB video output:	
R output level:	0.7 Vp-p (75 Ω)
G output level:	0.7 Vp-p (75 Ω)
B output level:	0.7 Vp-p (75 Ω)
Terminal:	Scart jack (1 system)
HDMI AV output:	19 pin type A connector, HDMI Ver.1.2a (EDID Ver.1.3)

Power consumption in standby mode:

approx 0.5W

Note:

1. Specifications are subject to change without notice. Mass and dimensions are approximate.
2. Total harmonic distortion is measured by the digital spectrum analyzer.

Solder:

This model uses lead free solder (PbF).

Mechanism:

This model uses DL2SU (Single tray) mechanism.

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public.
It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.
Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Panasonic

1. Safety Precautions

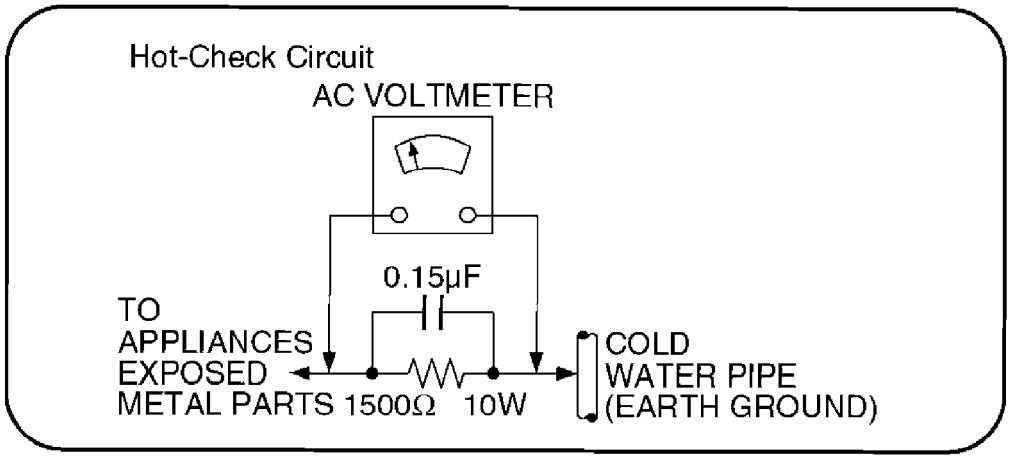
1.1. GENERAL GUIDELINES

1. **When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.**
2. **After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.**
3. **After servicing, carry out the following leakage current checks to prevent the customer from being exposed to shock hazards.**

1.1.1. LEAKAGE CURRENT COLD CHECK

1. **Unplug the AC cord and connect a jumper between the two prongs on the plug.**
2. **Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between 1M Ω and 5.2M Ω . / When the exposed metal does not have a return path to the chassis, the reading must be ∞.**

Figure 1



1.1.2. LEAKAGE CURRENT HOT CHECK (See Figure 1.)

1. **Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.**
2. **Connect a 1.5k Ω , 10 watts resistor, in parallel with a 0.15 µ F capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.**
3. **Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.**
4. **Check each exposed metallic part, and measure the voltage at each point.**
5. **Reverse the AC plug in the AC outlet and repeat each of the above measurements.**
6. **The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.**

1.2. Before Repair and Adjustment

Disconnect AC power, discharge Power Supply Capacitors C5716, C5717, C5718 through a 10 Ω , 10 W resistor to ground.
DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices.
After repairs are completed, restore power gradually using a variac, to avoid overcurrent.
Current consumption at AC 230 V, 50 Hz in NO SIGNAL mode volume minimal should be ~ 600 mA. (For E/ EG)

Current consumption at AC 230V~240 V, 50 Hz in NO SIGNAL mode volume minimal should be ~ 600 mA. (For EB)

1.3. Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.

- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are
“shorted”, or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.
If this occurs, follow the procedure outlines below:

1. **Turn off the power.**
2. **Determine the cause of the problem and correct it.**
3. **Turn on the power once again after one minute.**

Note:
When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

2. Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. **Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.**
2. **After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.**
3. **Use only a grounded-tip soldering iron to solder or unsolder ES devices.**
4. **Use only an anti-static solder removal device. Some solder**

removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.

5. **Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.**
6. **Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).**
7. **Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.**

   Caution

   Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.
8. **Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).**

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are imporant for safety.
These parts are marked by ⚠ in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock. fire, or other hazards. Do not modify the original design without permission of manufacturer.

3. Precaution of Laser Diode

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pick-up lens.
Wave length: 662nm(DVD)/785nm(VCD/CD)
Maximum output radiation power from pick-up: 100 µW/VDE

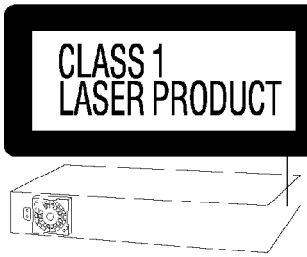
Laser radiation from the pick-up unit is safety level, but be sure the followings:

1. Do not disassemble the pick-up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pick-up unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick-up lens for a long time.

ACHTUNG: Dieses Produkt enthält eine Laserdiode. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit adgestrahit.
Wellenlänge: 662nm(DVD)/785nm(VCD/CD)
Maximale Strahlungsleistung der Lasereinhelt: 100 µW/VDE

Die strahlungan der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werksseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.



(Side of product)

(Inside of product)

The laser product label has not been attached to products for the U.S.A and Canada

CAUTION:
THIS PRODUCT UTILIZES A LASER.
USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

4. About Lead Free Solder (PbF)

4.1. Service caution based on legal restrictions

4.1.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.
The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. **(See right figure)**	PbF

Service caution for repair work using Lead Free Solder (PbF)

- **The lead free solder has to be used when repairing the equipment for which the lead free solder is used.**
  (Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- **To put lead free solder, it should be well molten and mixed with the original lead free solder.**
- **Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.**
- **Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.**

- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at 350±30 degrees C (662±86°F).

Recommended Lead Free Solder (Service Parts Route.)

- The following 3 types of lead free solder are available through the service parts route.
RFKZ03D01K----------(0.3mm 100g Reel)
RFKZ06D01K----------(0.6mm 100g Reel)
RFKZ10D01K----------(1.0mm 100g Reel)

Note
*** Ingredient: tin (Sn), 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%**

5. Caution for AC Mains Lead

(For United Kingdom)
("EB"area code model only)
For your safety, please read the following text carefully.
This appliance is supplied with a moulded three pin mains plug for your safety and convenience.
A 5-ampere fuse is fitted in this plug.
Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.
Check for the ASTA mark or the BSI mark on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local dealer.

CAUTION!
IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.
THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below.
If in any doubt please consult a qualified electrician.

IMPORTANT
The wires in this mains lead are coloured in accordance with the following code:
Blue: Neutral, Brown: Live.
As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

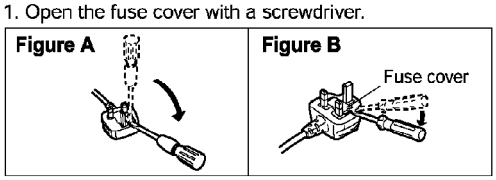
WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL ⏚ OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF– KEEP DRY.

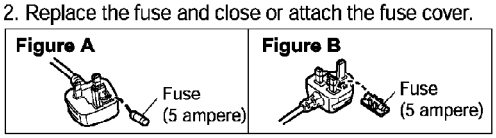
Before use
Remove the connector cover.

How to replace the fuse
The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.
Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.



2. Replace the fuse and close or attach the fuse cover.



6. Handling Precautions for Traverse Unit

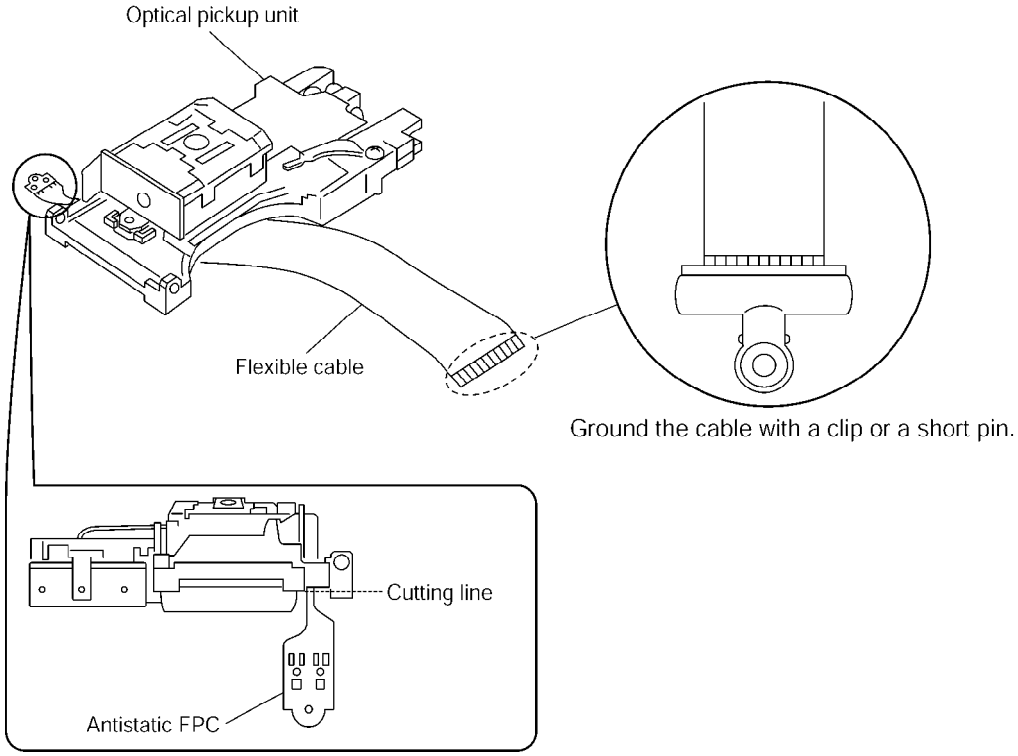
The laser diode in the optical pickup unit may break down due to static electricity of clothes or human body. Special care must be taken avoid caution to electrostatic breakdown when servicing and handling the laser diode.

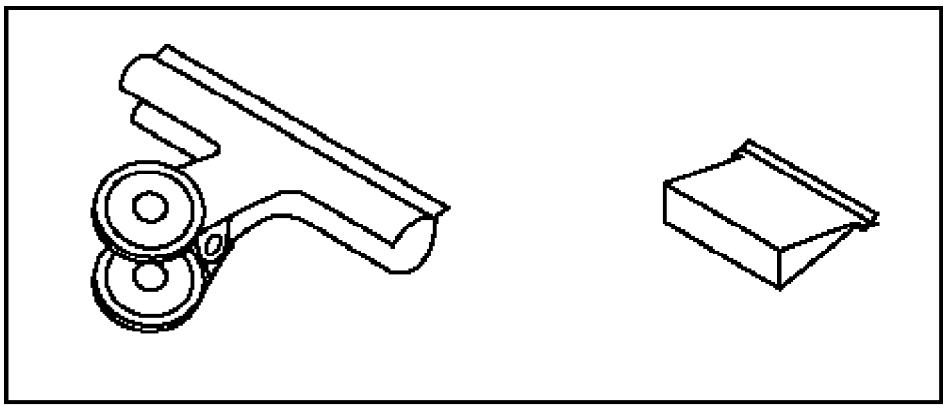
6.1. Cautions to Be Taken in Handling the Optical Pickup Unit

The laser diode in the optical pickup unit may be damaged due to electrostatic discharge generating from clothes or human body. Special care must be taken avoid caution to electrostatic discharge damage when servicing the laser diode.

1. **Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.**
2. **To prevent the laser diode from the electrostatic discharge damage, the flexible cable of the optical pickup unit removed should be short-circuited with a short pin or a clip.**
3. **The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the flexible cable.**
4. **The antistatic FPC is connected to the new optical pickup unit.**

After replacing the optical pickup unit and connecting the flexible cable, cut off the antistatic FPC.





Clip or Short pin

6.2. Grounding for electrostatic breakdown prevention

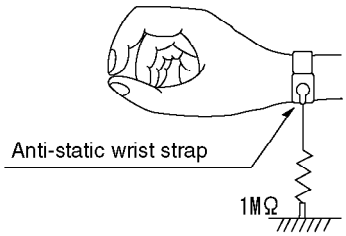
Some devices such as the DVD player use the optical pickup (laser diode) and the optical pickup will be damaged by static electricity in the working environment. Proceed servicing works under the working environment where grounding works is completed.

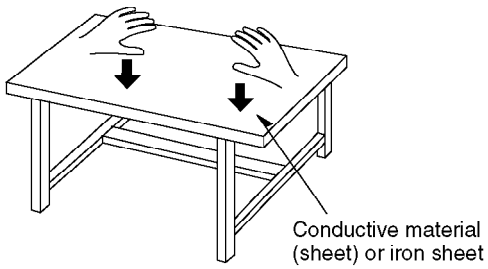
6.2.1. Worktable grounding

1. Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed, and ground the sheet.

6.2.2. Human body grounding

1. Use the anti-static wrist strap to discharge the static electricity form your body.





7. Accessories

8. Operation Procedures

8.1. Operating instructions

8.2. Main Unit Keys Operation

8.3. Connection Setup (HDMI/ Scart)

Below is the guide for the connection between the main unit and television and/ or Set Top Box.

Caution:

- Do not connect through the video cassette recorder. (Due to copyguard protection, the picture may not be displayed properly.)

- Turn off the television before connection.

8.3.1. Connecting with television and Set Top Box

8.3.2. Connecting with HDMI-compatible TV & Set Top Box

8.4. Use of HDAVI Control

8.5. Using of Music Port

8.6. Disc Information

8.6.1. Disc Playability (Media)

8.6.2. File Extension Type Support (WMA/MP3/JPEG/MPEG4/DivX)

8.7. About DivX VOD Content

9. New Features

9.1. About HDMI

9.1.1. What is HDMI?

9.1.2. Advanced Digital Pictures

9.1.3. Advanced Digital Sound

9.1.4. Easy to Use

9.1.5. HDMI Compatible Products

10. Self-Diagnosis and special mode setting

10.1. Service Mode Summary Table

The service modes can be activated by pressing various button combination on the player and remote control unit.
Below is the summary of major checking:

Player buttons	Remote control unit buttons	Application	N
STOP	0	Error code display	(Refer to section, Self Diag Function Code").
	5	Jitter checking	(Refer to section ' Service I Table 1" informat
	6	Region display and mode	
	7	Micro-processor firmware version check	
	≧10	Initialization of the player (factory setting is restored.) Used after replacement of micro-computer, FLASH ROM IC, EEPROM and HDMI module.	
	8	DVD HDMI module firmware version check.	
	ENTER	DVD Module Reset.	
	FUNCTIONS	DVD laser drive current check	(Refer to "10.2.1. (Pick-up S Diagnos
	3	CD laser drive current check	
	PAUSE	Writing of laser drive current value after replacement of optical pickup (Do use this function only when optical pickup is replaced.)	

10.2. Service Mode Table 1

By pressing various button combinations on the player and remote control unit can activate the various service modes for checking.

Special Note:
Due to the limitations of the no. characters that can be shown on FL Display, the "FL Display" button on the remote control uni is used to show the following page. (Display 1/Display 2).

10.2.1. Optical Pick-up Self-Diagnosis

The optical pickup self-diagnosis function and tilt adjustment check function have been included in this unit. When repairing, use the following procedure for effective self-diagnosis and tilt adjustment. Be sure to use the self-diagnosis function before replacing the optical pickup when "NO DISC" is displayed. As a guideline, you should replace the optical pickup when the value of

the laser drive current is more than 55.

Note:
Press the power button to turn on the power, and check the value within three minutes before the unit warms up. (Otherwise, the result will be incorrect.)

10.3. DVD Self Diagnostic Function-Error Code

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
U11	Focus servo error	Focus coil NG (OPU unit abnormal) or disc media is dirty		Press [■ ST on main unit f next error.
H01	Tray loading error / abnormality	The tray is not able to open		Press [■ ST on main unit f next error
H02	Spindle servo error, DSC disc motor error	(Spindle servo, DSC (IC8251) Spindle motor, CLV servo error)		Press [■ ST on main unit f next error
H03	Traverse motor error	(Traverse motor, IC8251)		Press [■ ST on main unit f next error
H04	Tracking servo error	Tracking coil NG (OPU unit abmormal)		Press [■ ST on main unit f next error
H05	Seek timeout error	Timeout of unit when seeking time is reached		Press [■ ST on main unit f next error
H15	Disc tray open detection switch (S9001) failure	The disc tray cannot be opened: it closes spontaneously		Press [■ ST on main unit f next error
H16	Disc tray close detection switch (S9001) failure	The disc tray cannot be closed : it opens spontaneously		Press [■ ST on main unit f next error
F61	Power digital amp IC op & DC output voltage abnormal.	Upon power-on PCONT=High, DCDET=Low. Speaker connection could be problem		Press [■ ST on main unit f next error
F76	Power digital amp IC op & DC output voltage abnormal.	Speaker Jack shorted or amp circuit		Press [■ ST on main unit f next error
F500	DSC error	DSC (IC8251) stops in the occurrence of servo error (startup, focus error, etc.)		Press [■ ST on main unit f next error

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
F501	DSC not Ready error	DSC-system computer communication error (Communication failure caused by idling of DSC)		Press [■ ST on main unit f next error
F502	DSC Time out error	Similar as F500		Press [■ ST on main unit f next error
F503	DSC communication Failure	Communication error (result error occurred although communication command was sent)		Press [■ ST on main unit f next error
F504	Abnormal adjusting DSC data slice offset			Press [■ ST on main unit f next error
F505	DSC Attention error	Similar as F500		Press [■ ST on main unit f next error
F506	Invalid media	Disc is flipped over, TOC unreadable, incompatible disc media		Press [■ ST on main unit f next error
F600	Access failure to management information caused by demodulation error	Operation stopped because navigation data is not accessible caused by the demodulation defect		Press [■ ST on main unit f next error
F601	Indeterminate sector ID requested	Operation stopped caused by the request to access abnormal ID data		Press [■ ST on main unit f next error
F602	Access failure to LEAD-IN caused by demodulation error	LEAD IN data unreadable		Press [■ ST on main unit f next error
F603	Access failure to KEYDET caused by demodulation error	Access failure to CSS data of disc		Press [■ ST on main unit f next error
F610	ODC abnormality	No permission for command execution		Press [■ ST on main unit f next error
F611	No CRC OK for a specific time (CD)	Access failure to seek address in CD series		Press [■ ST on main unit f next error
F612	No CRC OK for a specific time (DVD)	Access failure to ID data in DVD series		Press [■ ST on main unit f next error

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
F620	Laser safeguard: high temperature condition	High temperature of the laser guide unit (OPU unit)		Press [■ ST on main unit f next error
F621	Laser safeguard: circuit failure condition	Circuitry failure of the laser guide unit (OPU unit)		Press [■ ST on main unit f next error
F103	Illegal highlight Position	Big possibility of disc specification violation during highlight display		Press [■ ST on main unit f next error
F4FF	Force initialize failure (time out)	Timeout when force initialization fails		Press [■ ST on main unit f next error
F700	MBX overflow	When replying message to disc manager		Press [■ ST on main unit f next error
F701	Message command does not end	Next message is sent before replying to disc manager		Press [■ ST on main unit f next error
F702	Message command changes	Message is changed before it is sent as a reply to disc manager		Press [■ ST on main unit f next error
F880	Task number is not appropriate	Message coming from a non-existing task		Press [■ ST on main unit f next error
F890	Sending message when message is being sent to AV task	Sending message to AV task		Press [■ ST on main unit f next error
F891	Message couldn't be sent to AV task	Begin sending message to AV task		Press [■ ST on main unit f next error
F893	FLASH ROM IC problem	FLASH ROM IC installed is not operating properly (Neccessary replacement of FLASH ROM IC) or firmware problem		Press [■ ST on main unit f next error
F894	EEPROM abnormality	EEPROM IC installed is not operating in normal condition (EEPROM contains neccessary data)		Press [■ ST on main unit f next error
F895	Region setting abnormality	Firm version agreement check for factory preset setting failure prevention. Check region setting & re-initialize		Press [■ ST on main unit f next error

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
F896	No existence model	Firm version agreement check for factory preset setting failure prevention		Press [■ ST on main unit f next error
F897	Initialize is not completed	Initialize completion check for factory preset setting failure prevention		Press [■ ST on main unit f next error
F898	Disagreement of hardware and software	Unsuitable combination of AV DECORDER, SDRAM and FLASH ROM (firmware)		Press [■ ST on main unit f next error
F8A0	Message command is not appropriate	Begin sending message to AV task		Press [■ ST on main unit f next error
U701	HDMI compatibility	The connected equipment is not HDMI-compatible, HDMI cable is damaged.		Press [■ ST on main unit f next error

Note:

An error code will be canceled if a power supply is turned OFF.

***1: CPPM is the copy guard function beforehand written in the disk for protection of copyrights.**

***2: CEC is the consumer electronic control used for high-level user control of HDMI-connected devices.**

***3: HDCP is the specification developed to control digital audio & video contents transmission for DVI or HDMI connections.**

10.4. Sales Demonstration Lock Function

This function prevents discs from being lost when the unit is used for sales demonstrations by disabling the disc eject function. "LOCKED" is displayed on the unit, and ordinary operation is disabled.

10.4.1. Setting

- Prohibiting removal of disc

1. **Select the DVD/CD function.**
2. **Press and hold down the ■ button and the power button on the player for at least three seconds. (The message, "___LOCKED_" appears when the function is activated.)**

Note:

OPEN/CLOSE ⏏, DISC CHECK and DISC CHANGE buttons are invalid and the player displays "___LOCKED_" while the lock function mode is entered.

- Prohibiting operation of selector and disk

1. Select the DVD/CD function.
2. Press and hold down the ▶ button and the power button on the player for at least three seconds. (The message, "___LOCKED_" appears when the function is activated.)

Note:
The following buttons are invalid and the player displays "___LOCKED_" while the lock function mode is entered.

Player	⏏, ■, ⏸, SELECTOR, ⏭, ⏮, VOLUME KNOB, DISC CHECI DISC CHANGE, DISC1-DISC5
Remote controller unit	SLEEP, REPEAT, 0~9, ≧10, RETURN, TOP MENU, ■, ⏸, ⏮, ⏭, ⏪, ⏩, POSITION MEMORY, TUNER/BAND, D.MIX, CH SELECT/ TEST, SET UP/ MUTING, DISPLAY, GROUP, TV, VCR/ AUX, QUICK REPLAY, SUBTITLE, FL DISPLAY, CH & VOLUME

10.4.2. Cancellation

The lock can be cancelled by the same procedure as used in setting. ("UNLOCK" is displayed on cancellation. Disconnecting the power cable from power outlet does not cancel the lock.)

10.5. Service Precautions

10.5.1. Recovery after the DVD player is repaired

- When the IC or HDMI module P.C.B. is replaced, carry out the recovery processing to optimize the drive.
  Playback the recovery disk to process the recovery automatically.
- Recovery disc (Product number: RFKZD03R005)
- Performing recovery process

1. Load the recovery disc RFKZD03R005 on to the player and run it.
2. Recovery is performed automatically. When it is finished, a message appears on the screen.
3. Remove the recovery disc.
4. Turn off the power.
5. Initialize the player.

10.5.2. Firmware version-up of the DVD player

- The firmware of the DVD player may be renewed to improve the quality including operability and playability to the substandard discs.processing to optimize the drive.
  The recovery disc has also firmware version-up.
- After version-up, recovery processing is executed automatically.
- Part number of the recovery disc for version-up will be noticed when it is supplied.
- Updating firmware

1. Load the recovery disc on to the player and run it.
2. Firmware version of the player is automatically checked. Appropriate message appears whenever necessary.
3. Using remote controller's cursor key, select whether version updating is to be done or not. (Selection of Yes/No)
4. a. If Yes is selected, version updating is performed.
   b. If No is selected, only recovery is performed.
5. a. When updating is finished, remove the disc according to the message appearing on the screen.
   b. Remove the disc according to the message appearing on the screen.
6. Turn off the power.

Note:
If the AC power supply is shut out during version-up due to a power failure, the version-up is improperly carried out.
In such a case, replace the FLASH ROM IC and carry out the version-up again.

10.5.3. DVD Module Reset

- When after replacing Flash Rom IC or the DVD Module P.C.B., FL displays error code " DVD F897". This means the unit is not initialized properly and the following process needs to be carry out.
- Procedures:

1. Press $\geqq 10$ on remote control while pressing "STOP" button on main unit.
2. FL display show "INIT"
3. While still pressing "STOP" button on main unit, press "ENTER" on remote control.
4. FL will display "DVD RESET" before FL display will change to

TOC reading again.

5. **Power off unit. Unplug the AC cord.**
6. **Power on the unit. It should be no problem. If problem persist check on the DVD module P.C.B. or FLASH ROM IC.**

11. Assembling and Disassembling

"ATTENTION SERVICER"

Be careful when disassembling and servicing.
Some chassis components may have sharp edges.
Special Note:

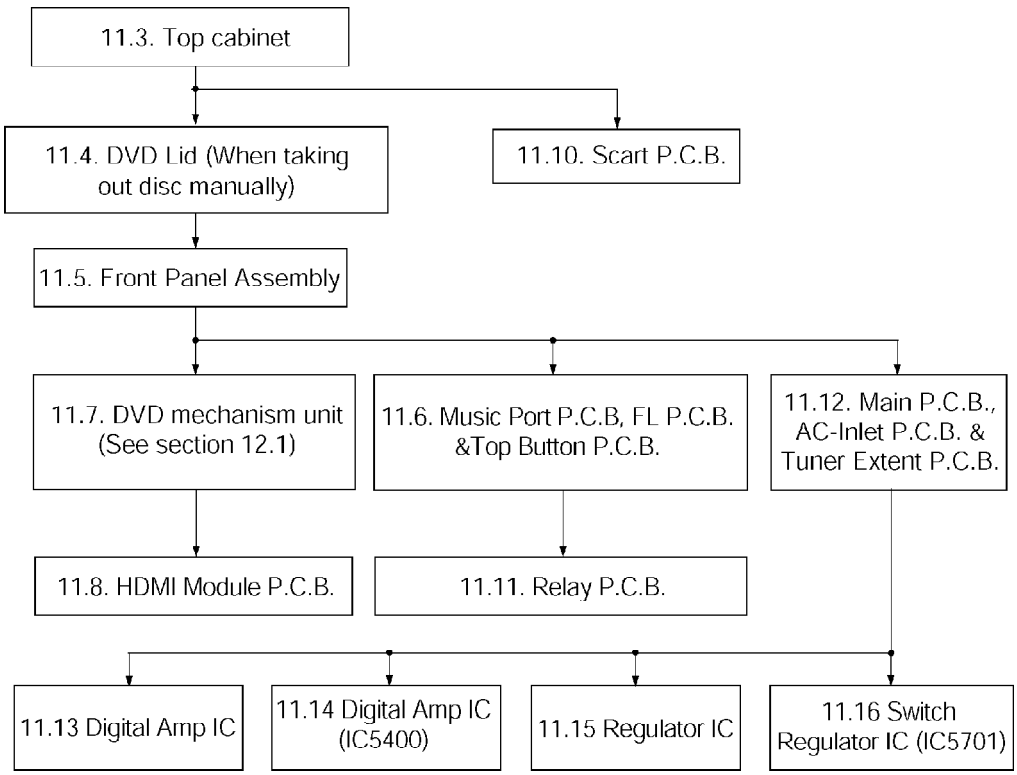
1. **This section describes the disassembly procedures for all the major printed circuit boards and main components.**
2. **Before the disassembly process was carried out, do take special note that all safety precautions are to be carried out. (Ensure that no AC power supply is connected during disassembling.)**
3. **For assembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.**
4. **The Switch Regulator IC may have high temperature after prolonged use. Use caution when removing the top cabinet and avoid touching heat sinks located in the unit.**
5. **Select items from the following index when checks or replacement are required.**

- **Disassembliy of Top Cabinet**
- **Disassembly of DVD Lid (When taking out disc manually)**
- **Disassembly of Front Panel**
- **Disassembly of Music Port P.C.B., FL P.C.B. & Top Button P.C.B.**
- **Disassembly of Mechanism Unit**
- **Disassembly of Relay P.C.B.**
- **Disassembly of Scart P.C.B.**
- **Disassembly of HDMI Module P.C.B.**
- **Disassembly of Main P.C.B., AC-Inlet P.C.B. & Tuner Extent P.C.B.**
- **Disassembly of Digital Amp IC**

- Disassembly of Digital Amp IC (IC5400)
- Disassembly of Regulator IC
- Disassembly of Switch Regulator IC (IC5701)

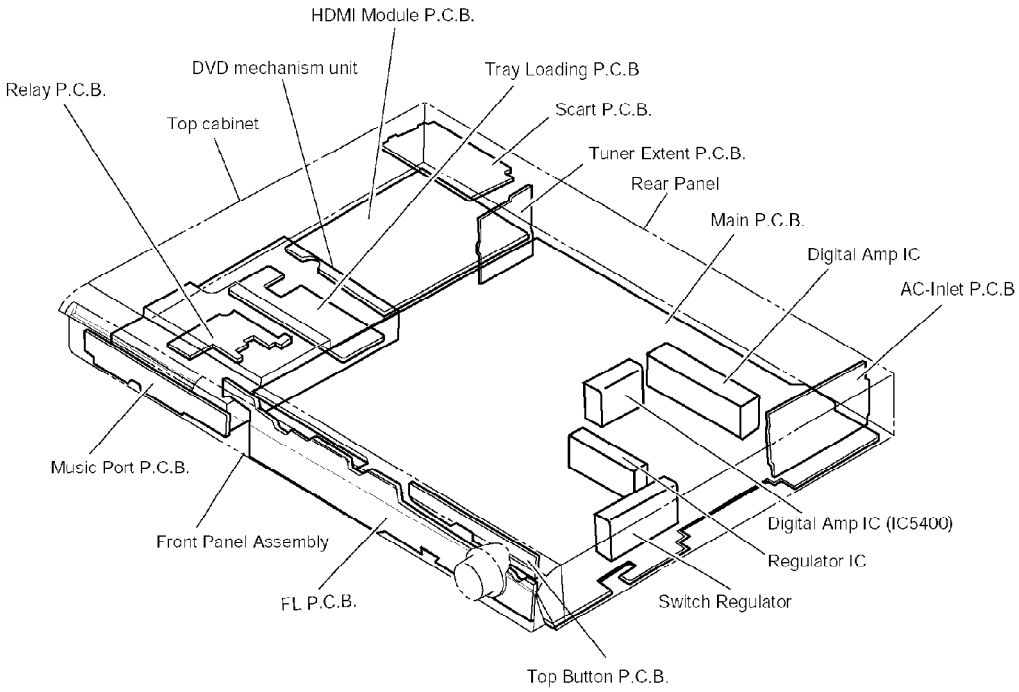
CAUTION NOTE:
Please use original screw and at correct locations.

11.1. Disassembly Flow Chart



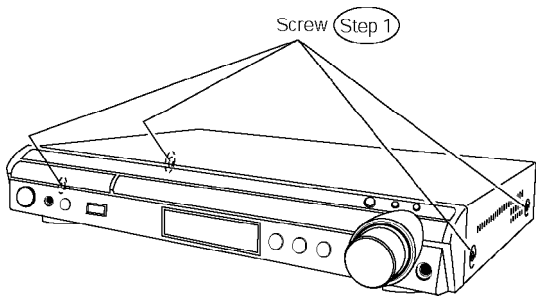
11.3. Top cabinet
11.4. DVD Lid (When taking out disc manually)
11.10. Scart P.C.B.
11.5. Front Panel Assembly
11.7. DVD mechanism unit (See section 12.1)
11.6. Music Port P.C.B, FL P.C.B. &Top Button P.C.B.
11.12. Main P.C.B., AC-Inlet P.C.B. & Tuner Extent P.C.B.
11.8. HDMI Module P.C.B.
11.11. Relay P.C.B.
11.13 Digital Amp IC
11.14 Digital Amp IC (IC5400)
11.15 Regulator IC
11.16 Switch Regulator IC (IC5701)

11.2. Main Components and P.C.B. Locations

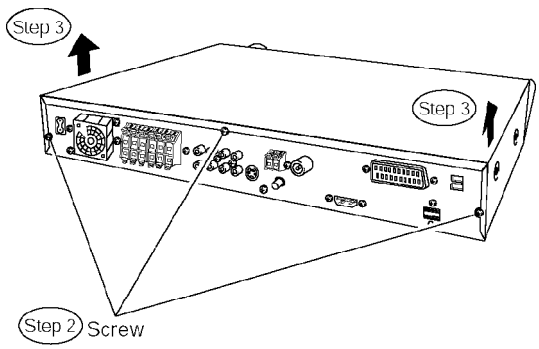


11.3. Disassembly of Top Cabinet

Step 1 Remove 4 screws.



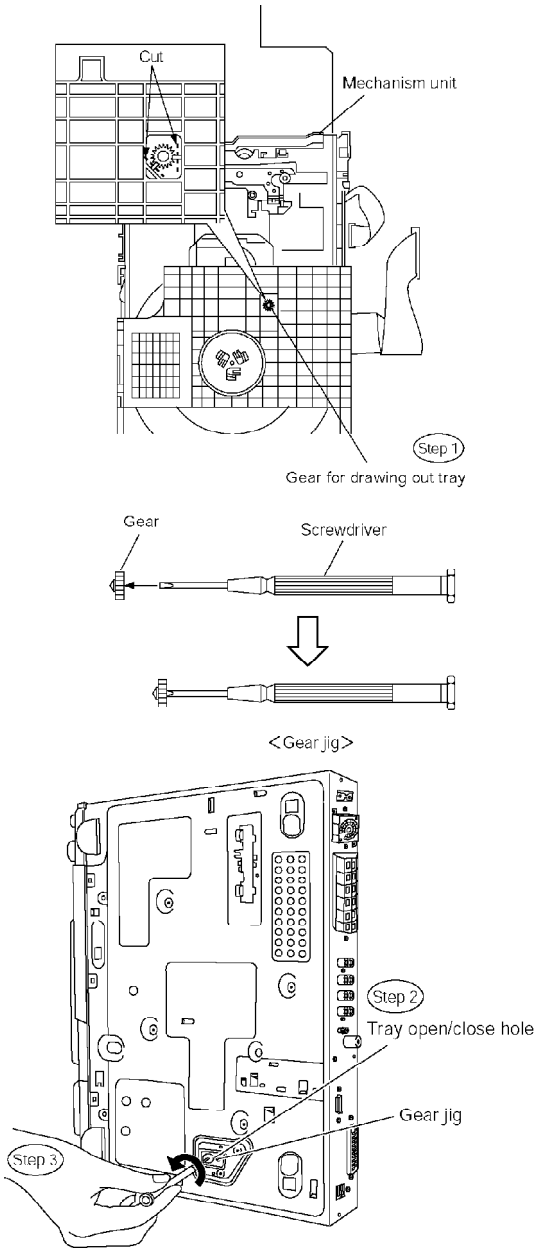
Step 2 Remove 3 screws. (Rear view)
Step 3 Lift up and remove the top cabinet.



11.4. Disassembly of the DVD Lid (When taking out disc manually)

Step 1 Detach the gear for drawing out tray from the mechanism unit. It inserts a screw driver in the gear. (The gear jig)
Step 2 Insert the gear jig into the tray open/ close hole.
Step 3 Turn the gear jig counterclockwise to open the tray.
Note : Do not use force to push the tray backwards as it can damage the mechanism unit.

Step 4 Turn the gear jig clockwise to return tray.



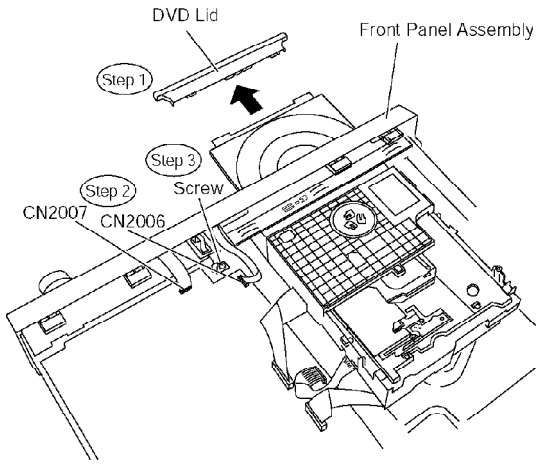
11.5. Disassembly of Front Panel Assembly

- Follow the Item 11.3.

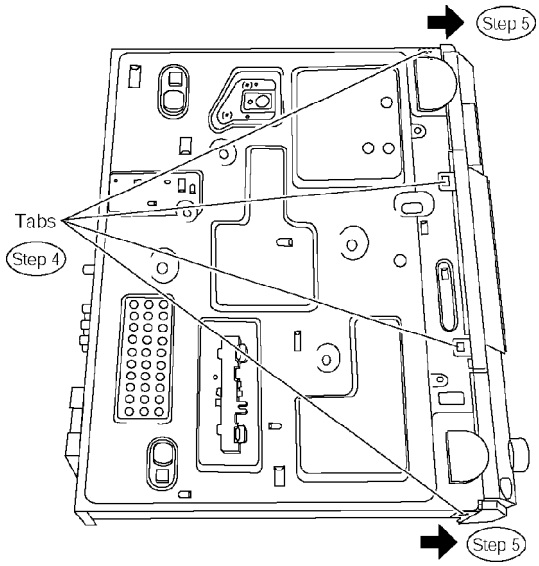
Step 1 Remove the DVD lid.

Step 2 Detach FFC cables at connectors. (CN2006, CN2007)

Step 3 Remove 1 screw.



Step 4 Release the tabs.



Step 5 Remove the front panel assembly.

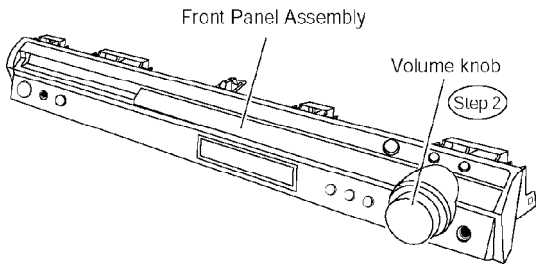
Special Note: Avoid placing the set in a position that might cause damage to the jacks when removing the front panel assembly.

11.6. Disassembly of Music Port P.C.B, FL P.C.B. & Top Button P.C.B.

- Follow the Item 11.5.

Step 1 Remove DVD lid.

Step 2 Remove the volume knob.



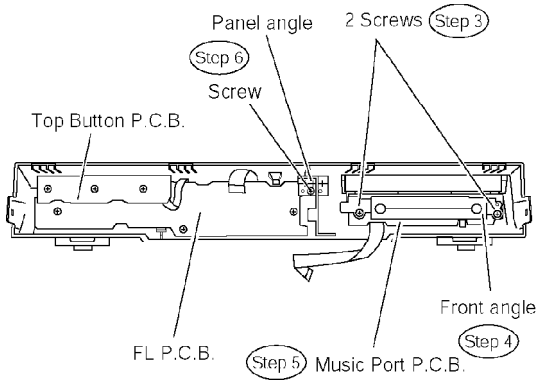
- Disassembly of Music Port P.C.B.

Step 3 Remove 2 screws.

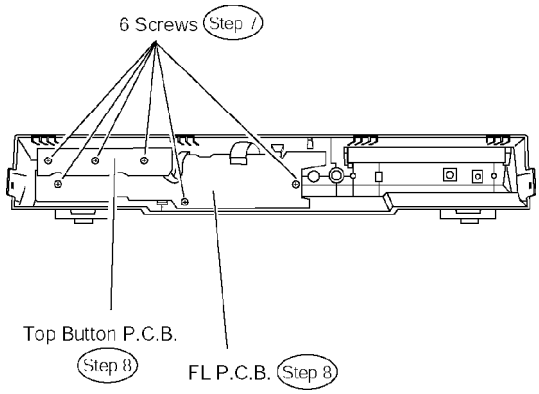
Step 4 Remove the front angle.
Step 5 Remove Music Port P.C.B.

- Disassembly of Top Button P.C.B.

Step 6 Remove 1 screw and the panel angle.



Step 7 Remove 6 screws.
Step 8 Remove FL P.C.B. & Top Button P.C.B.

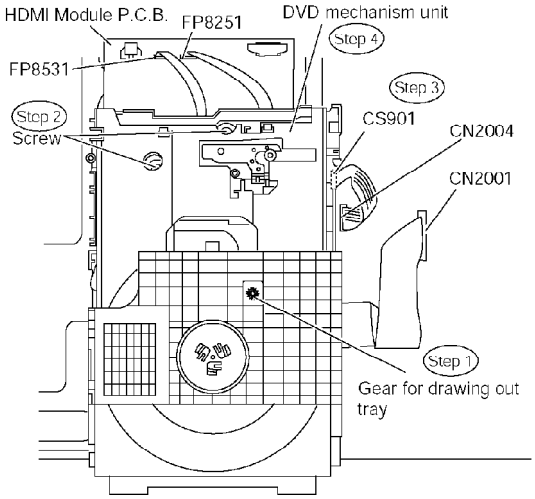


11.7. Disassembly of DVD Mechanism Unit

- Follow the Item 11.3.

- Follow (Step 1) of Item 11.5.

Step 1 Turn the gear jig clockwise to close the tray.
Step 2 Unscrew the screws.
Step 3 Detach FFC cable at connector (CS901).
Step 4 Lift up the mechanism unit vertically.



11.8. Disassembly of HDMI Module P.C.B.

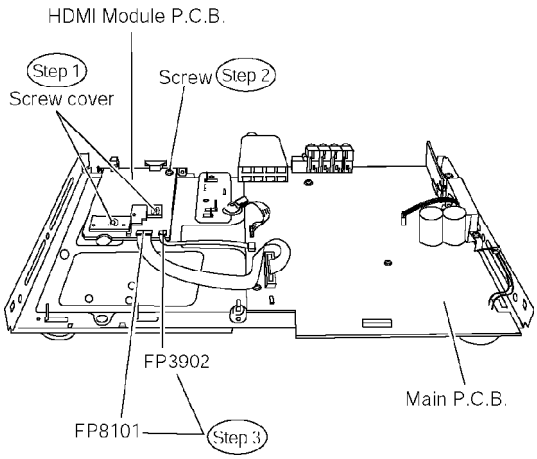
- Follow the Item 11.3.

- Follow the Item 11.7.

Step 1 Remove 2 screw covers.

Step 2 Remove 1 screw cover.

Step 3 Detach FFC cables at the connectors.(FP3902, FP8101)



Caution: Do not apply or exert excessive force when detaching the FFC cables.

11.9. Disassembly of Rear panel

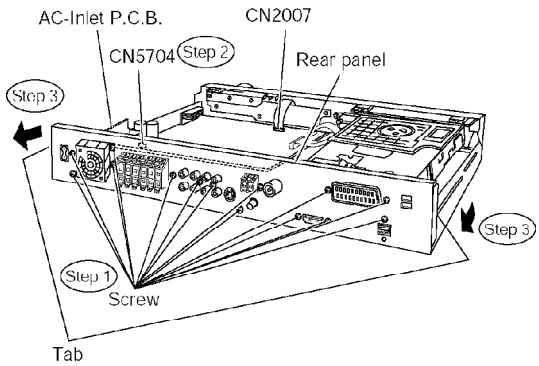
- Follow the Item 11.3.

Step 1 Remove 14 screws.

Step 2 Detach fan unit. (CN5704)

Step 3 Release the tabs.

Step 4 Remove the rear panel.



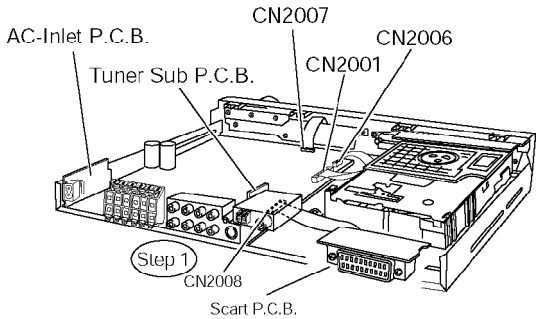
11.10. Disassembly of Scart P.C.B.

- Follow the Item 11.3.

- Follow the Item 11.9.

Step 1 Detach FFC cable at connector. (CN2008)

Step 2 Remove Scart P.C.B.

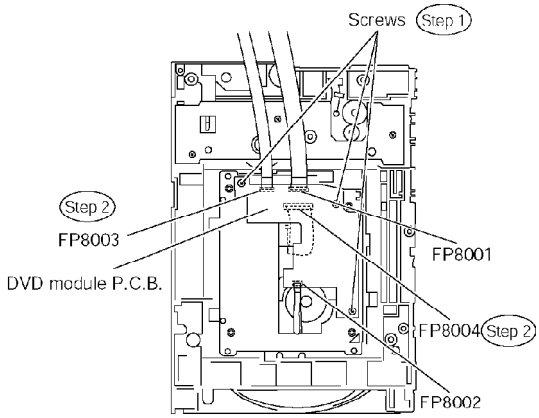


11.11. Disassembly of Relay P.C.B.

- Follow the Item 11.7.

Step 1 Remove 4 screws.

Step 2 Detach FFC cables at the connectors. (FP8001, FP8002, FP8003, FP8004)



<Mechanism unit bottom>

11.12. Disassembly of Main P.C.B., AC-Inlet P.C.B. & Tuner Extent P.C.B.

- Follow the Item 11.3.

- Follow the (Step 1) of Item 11.5.

- Follow the (Step 1) of Item 11.8.

- Follow the (Step 1) of Item 11.9.

- Follow the (Step 1) of Item 11.10.

Step 1 Unscrew 2 screws.

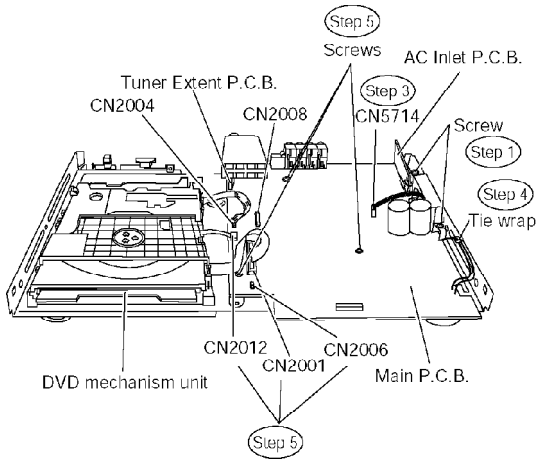
Step 2 Detach fan unit. (CN5714)

Step 3 Remove 2 tie wraps (used for blue/brown wires between AC-inlet P.C.B, and Power P.C.B.) to the side of bottom chassis.

Caution: Please tie wraps for the wires after repair to avoid the wires touching the nearby heatsink.

Step 4 Remove 5 screws.

Step 5 Detach FFC cables from the connectors. (CN2001, CN2004, CN2006, CN2008, CN2012)



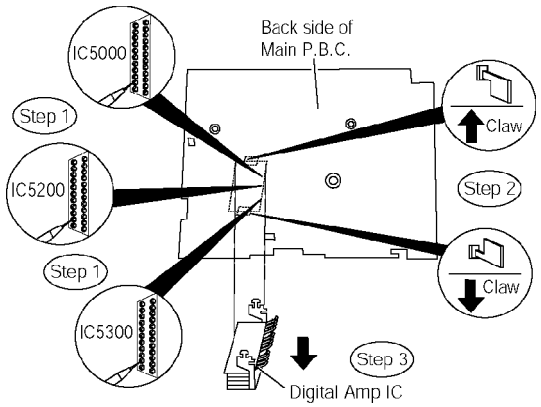
11.13. Disassembly of Digital Amp IC

- Follow (Step 1) to (Step 2) of Item 11.11.

Step 1 Desolder all IC5000, IC5200, IC5300 pins.

Step 2 Release the claws.

Step 3 Remove the D. Amp IC.



Note: Refer to the diagrams of Power P.C.B. (Section 19.2) for location of the parts.

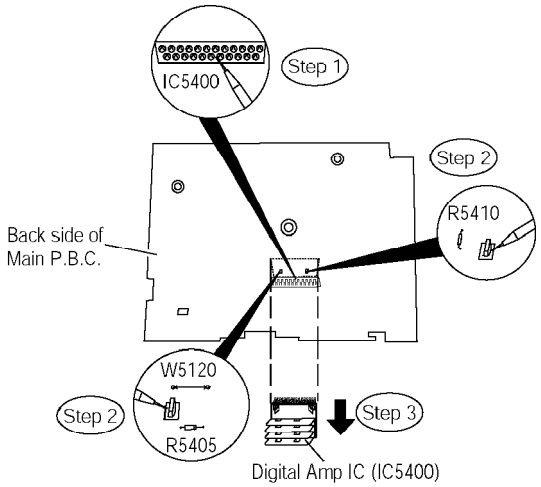
11.14. Disassembly of Digital Amp IC (IC5400)

- Follow (Step 1) to (Step 2) of Item 11.11.

Step 1 Desolder all pins of IC5400.

Step 2 Desolder 2 pins of Heat Sink B.

Step 3 Remove the Digital Amp IC (IC5400).

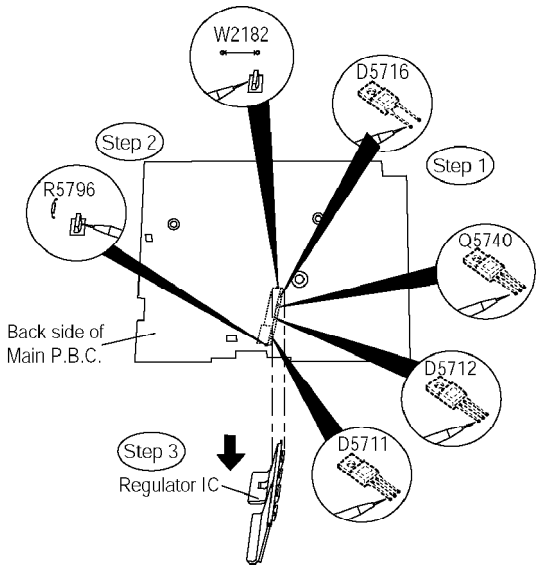


Note: Refer to the diagrams of Power P.C.B. (Section 19.2) for location of the parts.

11.15. Disassembly of Regulator IC

- Follow (Step 1) to (Step 2) of Item 10.11.

Step 1 Desolder all pins of D5711, D5716, D5717, D5718.
Step 2 Desolder 2 pins of Regulator IC.
Step 3 Remove the Regulator IC.

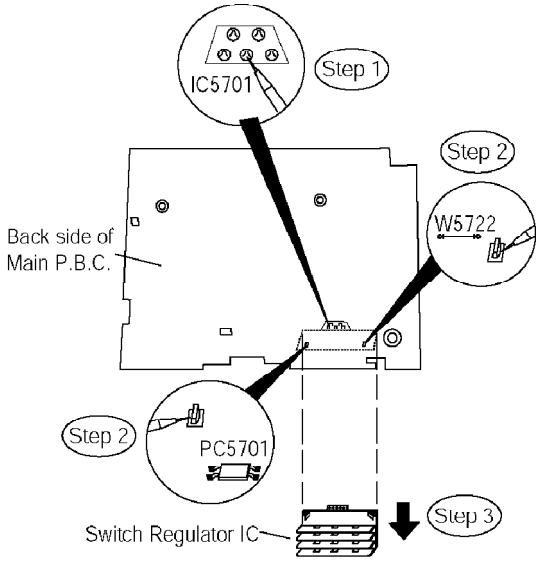


Note: Refer to the diagrams of Power P.C.B. (Section 19.2) for location of the parts.

11.16. Disassembly of Switch Regulator IC (IC5701)

- Follow (Step 1) to (Step 2) of Item 11.11.

Step 1 Desolder all pins of IC5701.
Step 2 Desolder 2 pins of Switch Regulator IC.
Step 3 Remove the Switch Regulator IC.



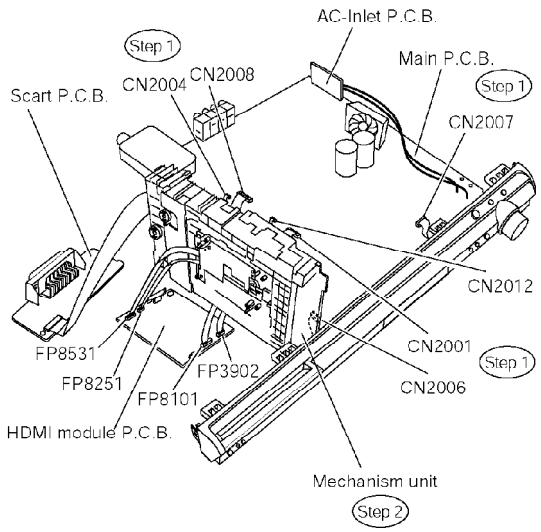
Note: Refer to the diagrams of Power P.C.B. (Section 19.2) for location of the parts.
Caution: Be careful when removing the Switch Regulator IC which has high temperature after prolonged use.

11.17. Service Position

11.17.1. Servicing position of the HDMI Module P.C.B.

- Follow the Item 11.7.
- Follow the (Step 1) to (Step 2) of Item 11.8.
- Follow the (Step 1) to (Step 2) of Item 11.9.

Step 1 Connect FFC cables at connectors. (CN2001, CN2004, CN2006, CN2007, CN2008, CN2012)
Step 2 Turn Mechanism unit to vertically position.



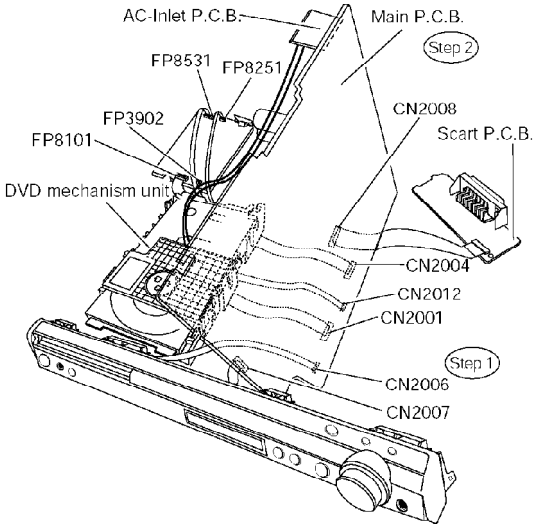
11.17.2. Servicing position of the Main P.C.B.

- Follow the Item 11.7.
- Follow the (Step 1) to (Step 2) of Item 11.8.
- Follow the (Step 1) to (Step 2) of Item 11.9.

Step 1 Connect FFC cables at connectors. (CN2001, CN2004, CN2006 & CN2007, CN2008,

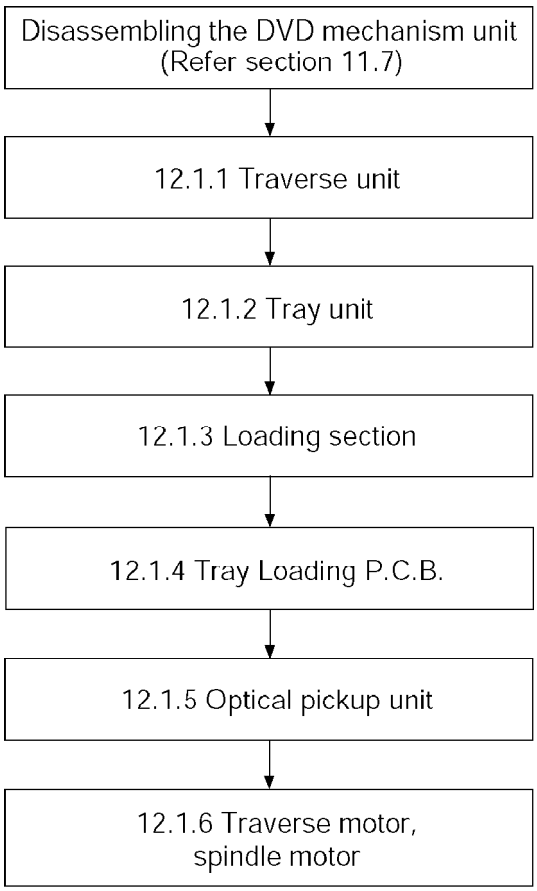
CN2012)

Step 2 Turn Main P.C.B to vertically position.



12. Assembly and disassembly of Mechanism Unit

12.1. Disassembly Procedure

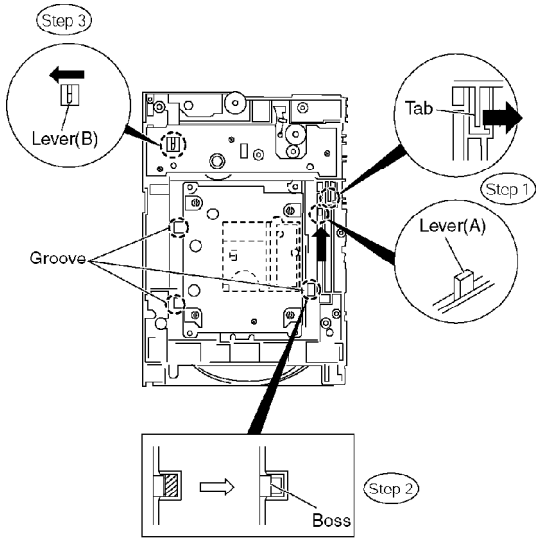


12.1.1. Disassembly of Traverse Unit

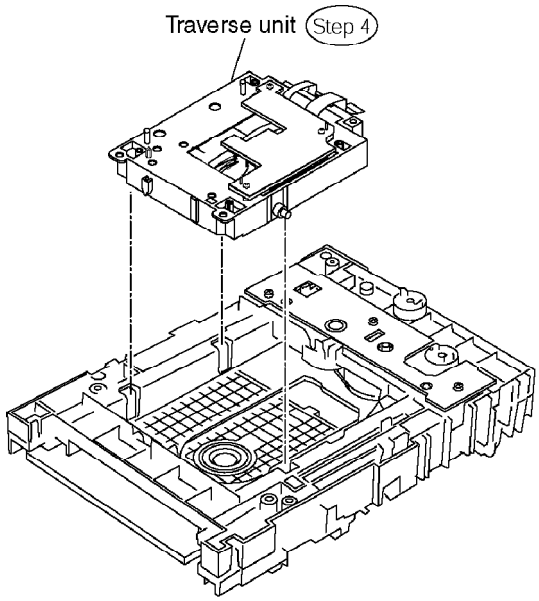
Step 1 Slide the lever (A) in the arrow direction (to the opposite side) till it stops.

Step 2 Slide the lever (A) further by bending the tab at the right side of the lever A in the right

direction. (The right groove opens and the boss becomes seen.)
Step 3 Open the lever (B) to left. (The 2 grooves at the left side open.).

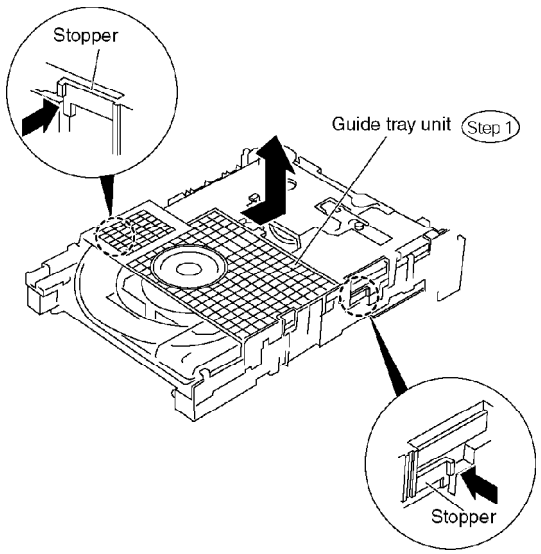


Step 4 Remove the traverse unit.



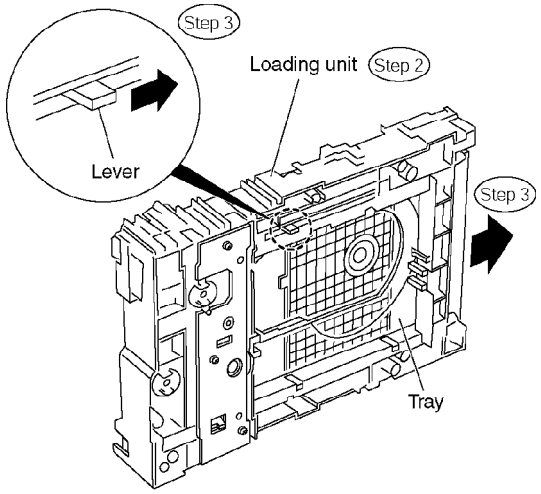
12.1.2. Disassembly of Tray Unit

Step 1 Slide the guide tray unit while pressing the stopper in the arrow direction, and remove the guide tray unit.

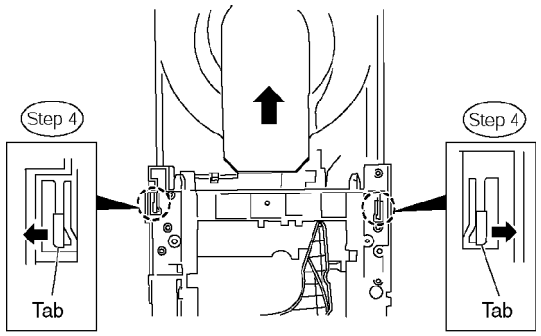


Step 2 Raise the loading unit.

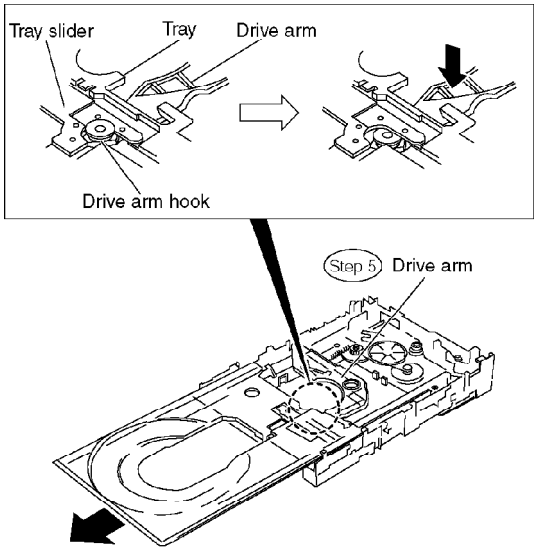
Step 3 Slide the lever in the arrow direction till it stops and pull the tray out.



Step 4 Spread the tabs at the both sides and pull the tray out. (The tray slides a little forword and stops.).



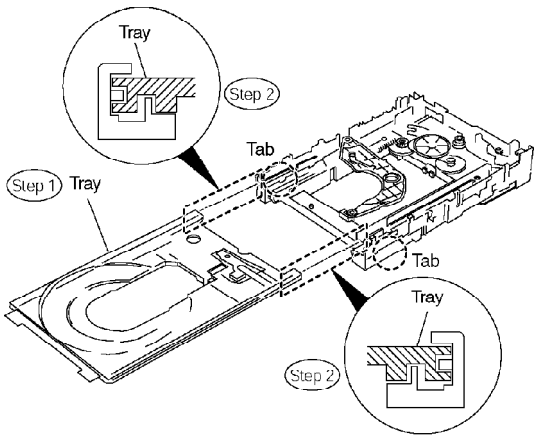
Step 5 Remove the drive arm concave phase from the tray slider and tray.



● **(Assembling the tray unit)**

Step 1 Insert a part of the tray into the unit sliding over the groove on the mechanical chassis unit.

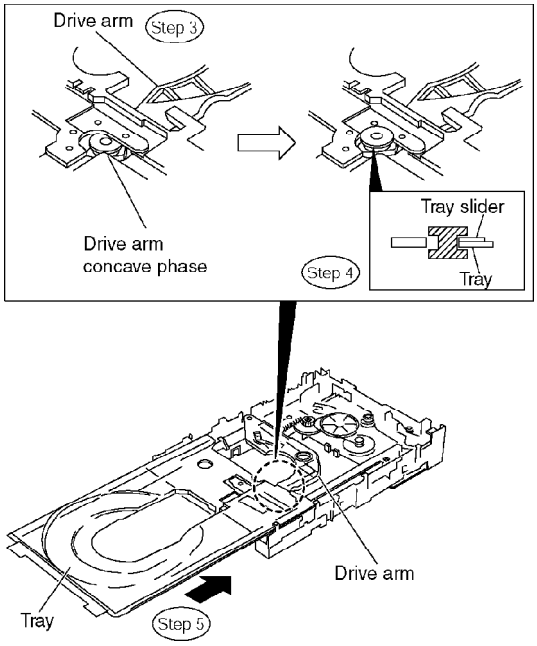
Step 2 Insert the tray to the point before the tab of the mechanical chassis unit.



Step 3 Hook the drive arm concave phase over the tray and the tray slider.

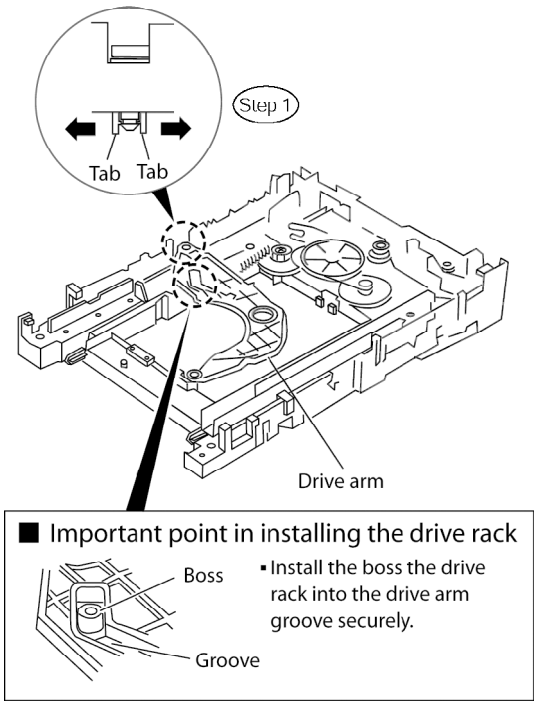
Step 4 Press in the tray.

Step 5 Make sure that the tray and the drive arm move smoothly.



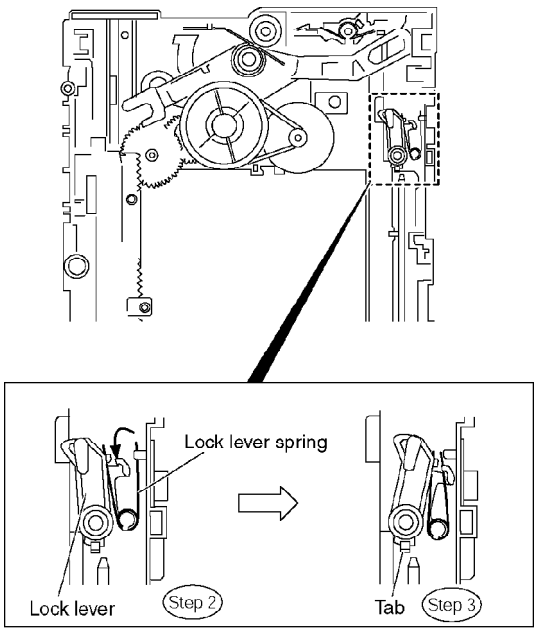
12.1.3. Disassembly of Loading section

Step 1 Spread the tabs at the both sides and push out the drive arm shaft.



Step 2 Hook the lock lever spring on the lock lever projection part temporarly.

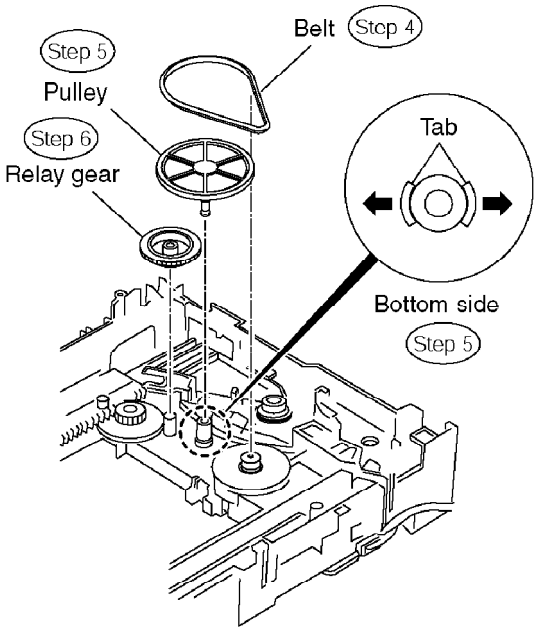
Step 3 Unlock the tab and remove the lock lever.



Step 4 Remove the belt.

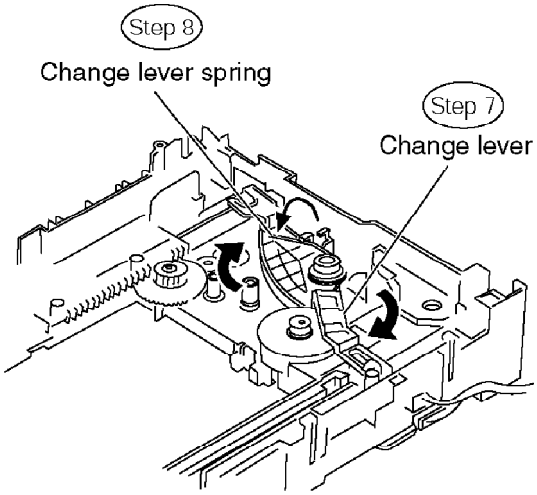
Step 5 Unlock the tab and remove the pulley.

Step 6 Remove the relay gear.

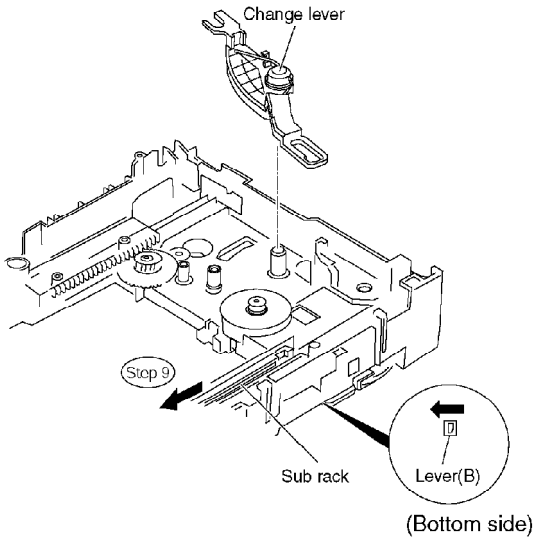


Step 7 Turn the change lever in the arrow direction till it stops.

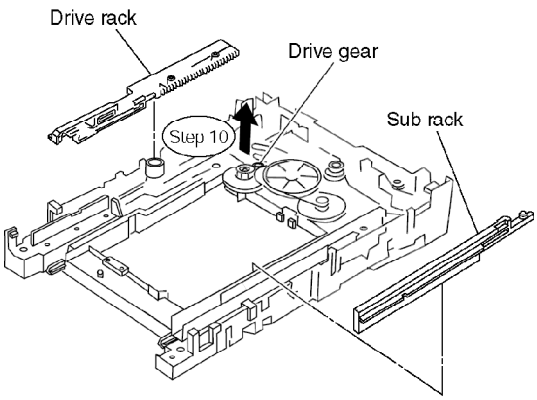
Step 8 Hook the change lever spring on the change lever project part temporarily.



Step 9 Pull the lever (B) in the bottom side to your side and remove the change lever.

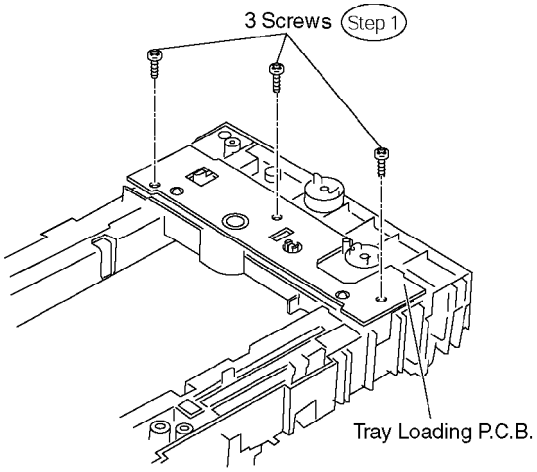


Step 10 Remove the drive rack, the sub rack and the drive gear.



12.1.4. Disassembly of Tray Loading P.C.B.

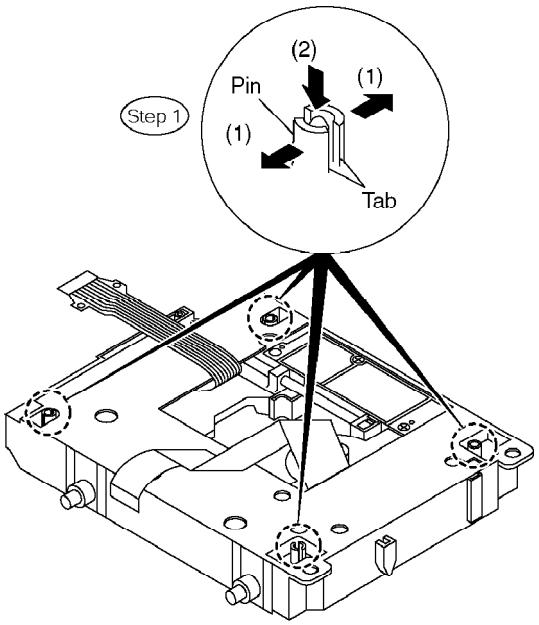
Step 1 Remove 3 screws



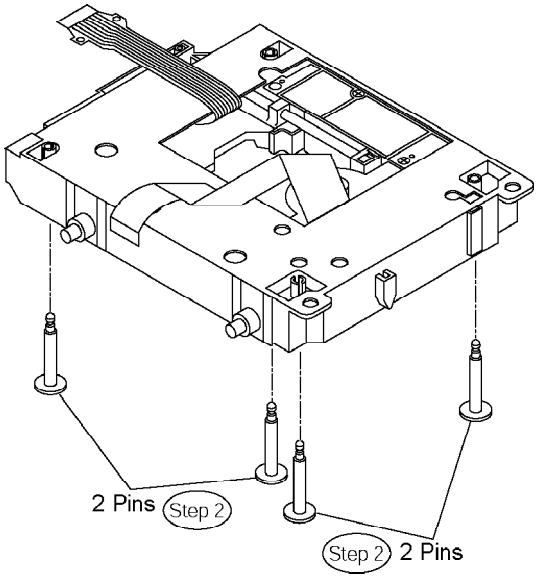
12.1.5. Disassembly of Optical Pickup Unit

Special Note: Anti-static measures are necessary due to handling of OPU unit .

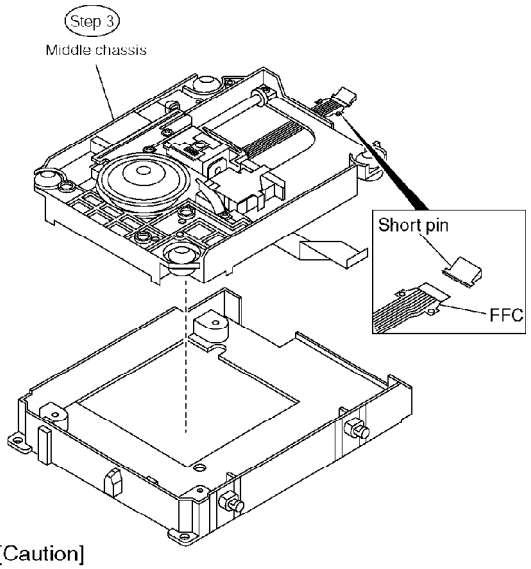
Step 1 Spread the tabs to push in the pin.



Step 2 Remove 4 pins.

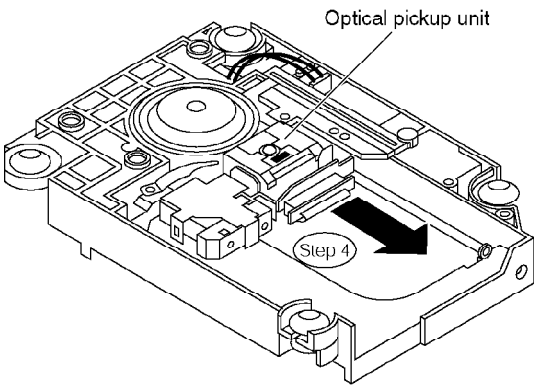


Step 3 Remove the middle chassis.

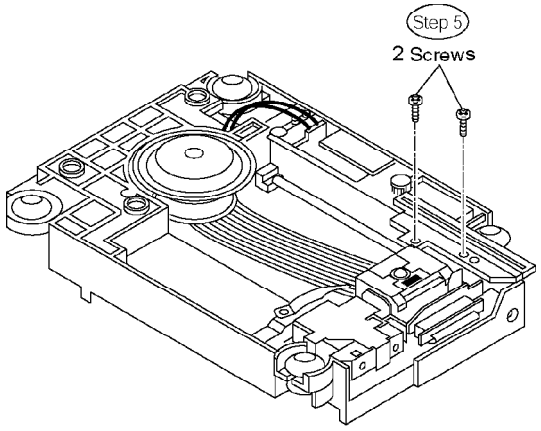


[Caution]
Insert the short pin into the FFC of the optical pickup unit. [See "Caution to be taken in handling the optical pickup unit"]

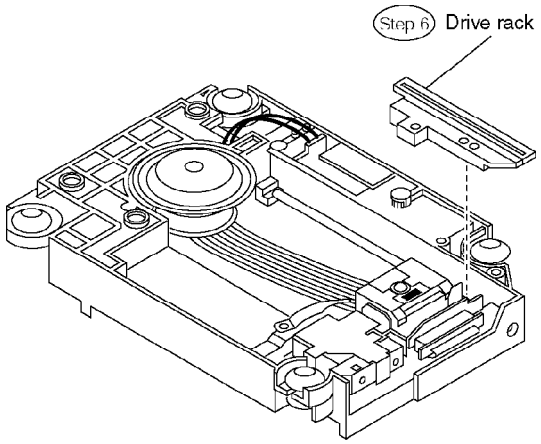
Step 4 Remove the optical pickup unit in the arrow direction till it stops.



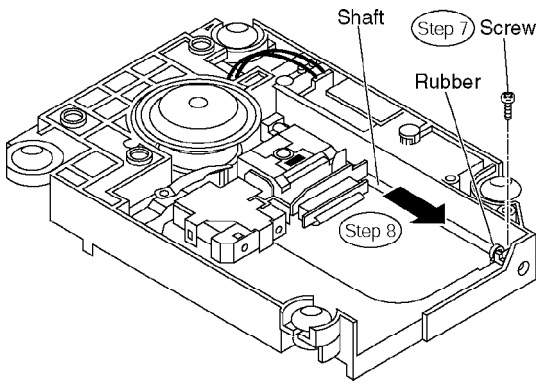
Step 5 Remove 2 screws.



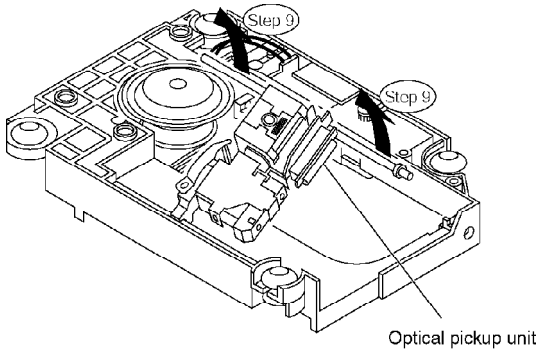
Step 6 Remove the drive rack.



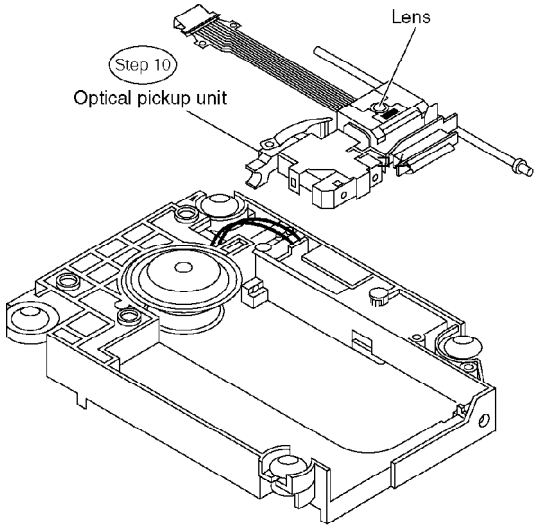
Step 7 Remove 1 screw.
Step 8 Slide the shaft in the arrow direction.



Step 9 Lift the optical pickup unit with the shaft.



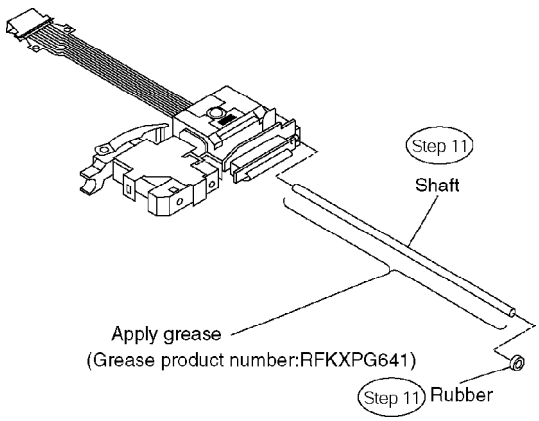
Step 10 Remove the optical pickup unit.



[Caution]

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. Do not touch the lens in the optical pickup unit.

Step 11 Pull the shaft and the rubber out.

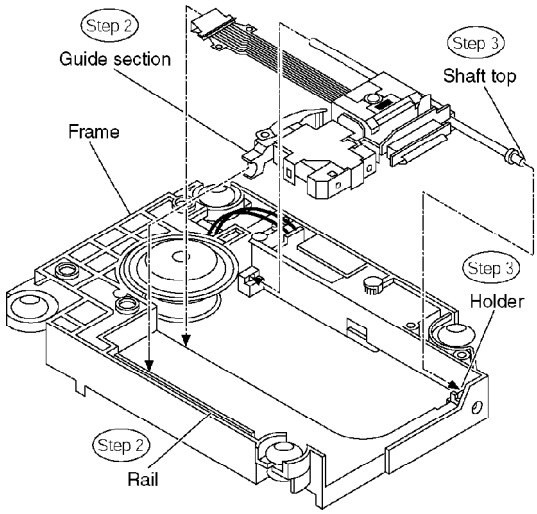


(Assembling the optical pickup unit)

Step 1 Pass the intermediate FPC through the frame hole.

Step 2 Align the guide section of the optical pickup unit with the rail.

Step 3 Install the shaft top to the holder.



13. Measurements and Adjustments

13.1. Service Tools and Equipment

Application	Name	Number
Tilt adjustment	DVD test disc	DVDT-S20 [SPG]
	TORX screw driver (T6)	Available on sales route. (T6) or RFKZ0185 [SPG]
Others	Grease	RFKXPG641 [SPG]
Confirmation	CD test disc	PVCD-K06 or any other commercially available disc
	VCD test disc	PVCD-K06 or any other commercially available disc
	Recovery disc	RFKZD03R005 [SPG]

13.2. Important points in adjustment

13.2.1. Important points in optical adjustment

- Before starting optical adjustment, be sure to take anti-static measures.

- Optical pickup tilt adjustment is needed after replacement of the following components.

1. Optical pickup unit

2. Spindle motor unit

3. Optical pickup peripheral parts

Notes

Adjustment is generally unnecessary after replacing other parts of the traverse unit. However,

make adjustment if there is a noticeable degradation in picture quality. Optical adjustments cannot be made inside the optical pickup. Adjustment is generally unnecessary after replacing the traverse unit.

13.2.2. Important points in electrical adjustment

- Follow the adjustment procedures described in this manual.

13.3. Storing and handling of test discs

- Surface precision is vital for DVD test discs. Be sure to store and handle them carefully.

1. Do not place discs directly onto the workbench, etc., after use.

2. Handle discs carefully in order to maintain their flatness. Place them into their case after use and store them vertically. Store discs in a cool place where they are not exposed to direct sunlight or air from air conditioners.

3. Accurate adjustment will not be possible if the disc is warped when placed on a surface made of glass, etc. If this happens, use a new test disc to make optical adjustments.

4. If adjustment is done using a warped disc, the adjustment will be incorrect and some discs will not be playable.

13.4. Optical adjustment

13.4.1. Optical pickup tilt adjustment

Measurement point	Adjustment point	Mode	Disc
	Tangential adjustment screw Tilt adjustment screw	T01 (inner periphery) play T30 (center periphery) T43 (outer periphery) play	DVDT-S20 [SPG]
Measuring equipment		Adjustment value	
None (Main unit display for servicing is used.)		Adjust to the minimum jitter value.	

13.4.1.1. Adjustment procedure

1. While pressing STOP button on the main unit, press "5" on the remote control unit.

2. Confirm that "J_xxx/yyy_zz" (display1/display2) is shown on the front display.

For your information:
"yyy" and "zz" shown to the right have nothing to do with the jitter value. "yyy" is the error

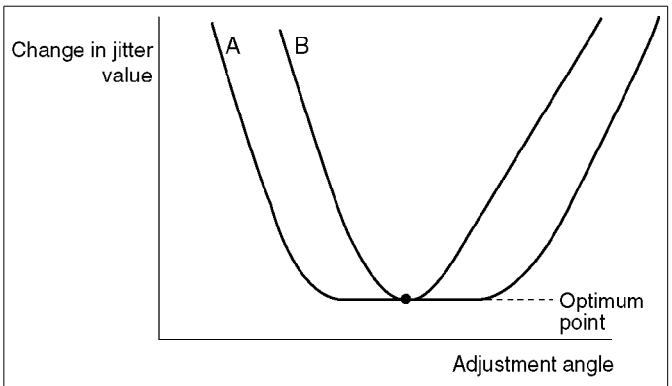
counter, while "zz" is the focus drive value.

Note:
Jitter value appears on the front display.

3. **Play test disc T30 (center periphery).**
4. **Adjust tangential adjustment screw so that the jitter value is minimized.**
5. **Play test disc T30 (center periphery).**
6. **Adjust tilt adjustment screw 1 so that the jitter value is minimized.**
7. **Play test disc T30 (center periphery).**
8. **Adjust tilt adjustment screw 2 so that the jitter value is minimized.**
9. **Repeat adjusting tilt adjustment screws 1 and 2 alternately until the jitter value is minimized.**

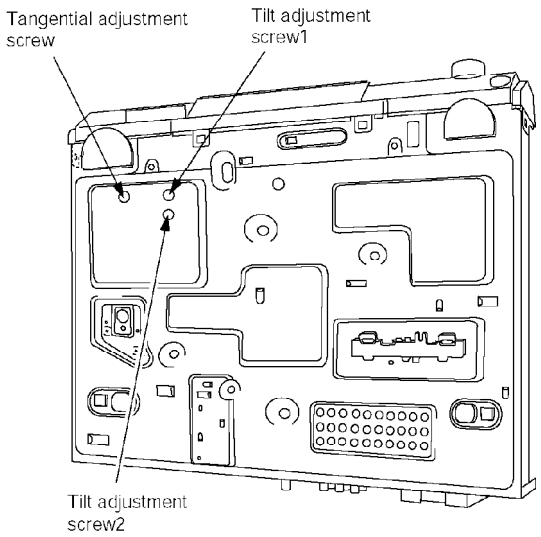
13.4.1.2. Important points

1. **Make tangential adjustment first, and then make tilt adjustment.**
2. **Repeat adjusting two or three times to find the optimum point.**
3. **Finish the procedure with tilt adjustment.**



Jitter value depends on the model:

1. If the jitter value changes like B, the optimum point is easy to find.
2. If the jitter value changes like A, set the optimum point near the middle.



13.4.1.3. Check after adjustment

Play test disc or any other disc to make sure there is no picture degradation in the inner, middle and outer peripheries, and no audio skipping. After adjustment is finished, lock each adjustment screw in position using screw lock.

13.4.1.4. Procedure for screw lock

1. **After adjustment, remove top cover, tray, clamper base and traverse unit in this sequence.**
2. **Lay the traverse unit upside down, and fix adjustment screw with screw lock.**
3. **After fixing, reassemble traverse unit, clamper base, tray and top cover.**

	TRSON	TRAVERSE SERVO ON

INITIAL/LOGO		ABBREVIATIONS
V	VBLANK	V BLANKING
	VCC	COLLECTOR POWER SUPPLY VOLTAGE
	VCDCONT	VIDEO CD CONTROL (TRACKING BALANCE)
	VDD	DRAIN POWER SUPPLY VOLTAGE
	VFB	VIDEO FEED BACK
	VREF	VOLTAGE REFERENCE
	VSS	SOURCE POWER SUPPLY VOLTAGE
W	WAIT	BUS CYCLE WAIT
	WDCK	WORD CLOCK
	WEH	WRITE ENABLE HIGH
	WSR	WORD SELECT RECEIVER

INITIAL/LOGO		ABBREVIATIONS
X	X	X' TAL
	XALE	X ADDRESS LATCH ENABLE
	XAREQ	X AUDIO DATA REQUEST
	XCDROM	X CD ROM CHIP SELECT
	XCS	X CHIP SELECT
	XCSYNC	X COMPOSITE SYNC
	XDS	X DATA STROBE
	XHSYNCO	X HORIZONTAL SYNC OUTPUT
	XHINT	XH INTERRUPT REQUEST
	XI	X' TAL OSCILLATOR INPUT
	XINT	X INTERRUPT
	XMW	X MEMORY WRITE ENABLE
	XO	X' TAL OSCILLATOR OUTPUT
	XRE	X READ ENABLE
	XSRMCE	X SRAM CHIP ENABLE
	XSRMOE	X SRAM OUTPUT ENABLE
	XSRMWE	X SRAM WRITE ENABLE
	XVCS	X V-DEC CHIP SELECT
	XVDS	X V-DEC CONTROL BUS
	XVSYNCO	STROBE
		X VERTICAL SYNC OUTPUT

16. Wiring Connection Diagram

17. Block Diagram

18. Schematic Diagram Notes

- This schematic diagram may be modified at any time with the development of new technology.

Notes:

S6800:

Tray open / close switch (Open / Close).

S6801:

Stop and TUNE mode /FM mode switch (TUNE MODE/FM MODE). /

S6802:

Play and memory switch (Memory).

S6803:

Source select switch (SELECTOR).

S6804:

F. skip, search and Tuning switch (/ / TUNING).

S6805:

R. skip, search and Tuning switch (/ / TUNING).

S6806:

Standby / on switch (POWER).

S6807:

Wide surround.

VR6800:

VR volume jog.

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

- Important safety notice:

Components identified by ⚠ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors),

etc. are used.
When replacing any of components, be sure to use only manufacturer´s specified parts shown in the parts list.

- The supply part number is described alone in the replacement parts list.

- Voltage and signal line

: +B Signal line

: CD-DA signal line

: Main signal line

: DVD (Video) signal line

: DVD (Audio) signal line

: FM/AM signal line

: -B Signal line

:MUSIC PORT signal line

AUX signal line

Caution!

IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.
Cover the parts boxes made of plastics with aluminum foil.
Ground the soldering iron.
Put a conductive mat on the work table.
Do not touch the legs of IC or LSI with the fingers directly.

23. Terminal Function of ICs

23.1. IC2018 (C2CBYY000196): Operation CPU

Pin No.	Terminal Name	I_O	Function
1	AVSS	-	Power supply for A/D converter
2	KEY1	I	Key 1 line input
3	KEY2	I	Key 2 line input
4	DES1	I	Tuner region setting
5	DES2	I	Model code Digit 1
6	DES3	I	DVD region setting
7	DISC SENSE	I	Disc sensor (RC1)
8	DES4	I	Model code Digit 2
9	DES5	I	Model code Digit 3
10	VREF+	-	+ Power supply for A/D converter
11	VCC	-	Power supply (5V)
12	XOUT	-	Main clock output (8MHz)
13	XIN	-	Main clock input (8MHz)
14	VSS	-	GND (0V)
15	VSS	-	GND (0V)
16	N.C	-	No connection
17	VSS	-	GND (0V)
18	DVD_PCONT	O	DVD module power control
19	RF_DET (WM_DET)	I	RF module detection - wireless ready
20	RF_LINK WM_LINK	I	RF link control - wireless ready
21	RF_PCNT (WM_UNMUTE)	O	RF power control
	PX_DA	I	PX-FW2 data
22	N.C	-	No connection
23	EDA	I/O	EEPROM data
24	ECK	O	EEPROM clock
25	ECS	O	EEPROM latch
26	RMT	I	REMOCON input
27	HOTPLUG	I	HDMI interrupt 1
28	CEC_IN	I	HDMI interrupt 2
29	POS_SW	I	Position sensor (RC1)
30	PULSE	I	Pulse sensor speed detection (RC1)
31	SYNC	I	AC failure detect input
32	VSS	-	GND (0V)
	VPP	-	Power supply (Flash Micom only)

Pin No.	Terminal Name	I_O	Function
33	RESET	I	System reset / PX-FW2 reset
34	PWM	O	Pulse width modulation (RC1)
35	AM_BP	O	AM beat proof
36	TU_SCL (PLL_CK)	O	Tuner clock
37	TU_SDA (PLL_DA)	O	Tuner data
38	TU_SD	I	Tuner signal detect
39	ST/DO (TU_ST)	I	Stereo indicator_data (Tuner to Opecon)
40	FM_DET	I	Tuner FM detect (Tuner to Opecon)
41	VPP	-	Power supply (Flash Micom only)
42	DVD_CMD	O	DVD Command (Opecon to syscon)
43	DVD_STA	I	DVD status (Syscon to Opecon)
44	DVD_CK	I	DVD clock (Syscon to Opecon)
45	MUTE_DVD	I	DVD mute (Syscon to Opecon)
46	CHG_DIR (ROLE_CH)	O	Wireless module change direction (Tx_Rx)
47	RMPORT_DET	I	Rear M.Port detect
48	ASP_DA	O	ASP data (R2S15203FP)
49	ASP_CK	O	ASP clock (R2S15203FP)
50	MUTE_HP	O	Headphone mute
51	MP_SEL (SELECT_A)	O	Select front MPort or rear MPort
52	SUB_LIMITER	O	Subwoofer frequency Limiter
53	VMUTE	O	Video mute control
54	N.C	-	No connection
55	WIDE_SURR	O	Surround Enhancer
56	CEC_OUT	I	Output port for HDMI
57	WS_EN	I	Surround Enhancer Enable
58	N.C	-	No connection
59	REG1	I	Speaker protection (For Latin America)
60	MODEL_SEL1	I	Model selector 1
61	MODEL_SEL2	I	Model selector 2

Pin No.	Terminal Name	I_O	Function
62	HB_EN	I	H.Bass enable (H=Enable, L= Disable)
63	N.C	-	No connection
64	MOD_DA	O	Digital amplifier standby control
65	HOP_DA (FHOP)	O	Digital Amp frequency hop control
66	MUTE_FSUB	O	Front / subwoofer mute
67	N.C	-	No connection
68	MUTE_SC	O	Surround / centre mute
69	LOAD (CAM_SW)	I	UP / DOWN switch (RC1)
70	OPEN_SW	I	OPEN switch (RC1)
71	PCONT	O	Relay power control (System)
72	N.C	-	No connection
73	N.C	-	No connection
74	N.C	-	No connection
75	N.C	-	No connection
76	N.C	-	No connection
77	N.C	-	No connection
78	N.C	-	No connection
79	N.C	-	No connection
80	N.C	-	No connection
81	DC_DET	I	DC detection (System)
82	DISC1_ / LED	O	Disc LED 1
83	WS_LED	O	Wide surround LED
84	N.C	-	No connection
85	N.C	-	No connection
86	N.C	-	No connection
87	FLD_STB	-	FL driver strobe
88	N.C	-	No connection
89	FL_CK	O	FL driver clock
90	FL_DAT	O	FL driver data
91	JOG_A	I	Volume jog signal A
92	JOG_B	I	Volume jog signal B
93	JOG_LED	O	VOlume jog LED
94	LOAD_ / REV	O	Loading motor control (Open_close-RC1)
95	VSS	-	-ve Power supply for D/A converter
96	LOAD_ / FWD	O	Loading motor control (Open_close-RC1)

Pin No.	Terminal Name	I_O	Function
97	TURN_ / FWD	O	Tray motor control (Turn-RC1)
98	TURN_ / REW	O	Tray motor control (Turn-RC1)
99	N.C	-	No connection
100	VDD	-	+ve Power supply for D_A converter

25. Replacement Parts List

Notes:

***Important safety notice:**

Components identified by ⚠ mark have special characteristics important for safety purpose. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

***Warning: This product uses a laser diode. Refer to caution statements.**

***Capacity values are in microfarads (μ F) unless specified otherwise, P=Pico-farads (pF), F= Farads (F).**

***Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000K (OHM).**
***The parenthesized indications in the Remarks columns specify the model names and areas. (Refer to the cover page)**
***The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.**
***Reference for O/I book languages are as follows:**
[En: English, Ge: German, It: Italian, Fr: French, Du: Netherlandic, Da:Danish, Sw: Swedish, Sp: Spanish, Po: Polish, Cz: Czech]
***[M] indicates in the Remarks columns indicates parts supplied by PAVCSG.**
***[SPG] indicates in the Remarks columns indicates parts supplied by SPG [PAVC].**

25.1. Component Parts List

Ref. No.	Part No.	Part Name & Description	Remarks
		CABINET AND CHASSIS	
1	J3CCBC000012	TUNER PACK	[M]
2	L6FAHAKH0001	FAN UNIT	[M]
3	L6FAYYYH0001	FAN UNIT	[M]

"NO DISC" is displayed, unit does not play smoothly, etc.
Check the laser drive current.
Value is 22 (DVD), 26(CD) or less.
Value is more than 26 (DVD), 27 (CD).
Replace the optical pickup. (Refer to the section "OPTICAL PICKUP REPLACEMENT PROCEDURE" in this Guide.)
Check the laser drive current after replacement.
· Write the present value into the unit if it is 22 (DVD), 26 (CD) or less.
Do the optical pickup tilt adjustment. (Refer to the section "TILT ADJUSTMENT" in this Guide.)
Use the tilt adjustment check function.
Initialize the player.
◎ Use the optical pickup self-diagnosis function.
Method: With no disc in the player:
· Press the "FUNCTIONS" button on the remote control unit while pressing the "STOP" button on the player. (DVD)
· Press the "3" button on the remote control unit while pressing the "STOP" button on the player. (CD)
[Display content (display1/display2)]
LDD / OOO OOO (DVD)
Factory setting Present value
LDC / OOO OOO (CD)
Factory setting Present value
Replace with a new optical pickup if the present value is more than 22 (DVD), 26 (CD).
Cause: Damage due to static electricity during replacement.
Method: With no disc in the player:
· Press the "FUNCTIONS" button on the remote control unit while pressing the "STOP" button on the player. (DVD)
· Press the "3" button on the remote control unit while pressing the "STOP" button on the player. (CD)
Write the present value if it is not exceeding 22 (DVD) or 26 (CD).
Writing method:
· Press the "PAUSE" button on the remote control unit while pressing the "STOP" button on the player.
Note: Press " FL DISPLAY " button on remote control unit for next page display

AN INTERFACE DESIGNED FOR THE DIGITAL REVOLUTION

From broadcast equipment to TVs, the AV world is going digital. As this digital revolution unfolds, there's a growing need for an interface that digitally transmits signals between connected equipment. The solution: HDMI, or High-Definition Multimedia Interface.

HDMI transmits digital video and audio signals at speeds up to 5 Gps without compressing them. It supports high-definition images up to 1080p and high-quality , multi-channel audio formats such as DVD-Audio. And it provides all this performance with the ease of connecting a single cable.

Also equipped with a copyright protection function, HDMI is a simple, high-performance interface that supports the growing digital age.

HDMI™

HIGH-DEFINITION MULTIMEDIA INTERFACE

TOSHIBA

HDMI™

HIGH-DEFINITION MULTIMEDIA INTERFACE

1. ADVANCED DIGITAL PICTURES

Digital transmission of video signals helps maximize the quality of HDTV images.

2. ADVANCED DIGITAL SOUND

Digital transmission of multi-channel audio signals, such as DVD-Audio signals, provides an exceptionally pure sound.

3. EASY TO USE

Both video and audio signals are transmitted over a single cable, so connection is easier and there's less clutter.

	Video Signal Type	Audio Signal	Copyright Protection	Signal Compression
HDMI	Digital	●	●	Without compression
IEEE 1394	Digital	●	●	Compression
DVI + HDCP	Digital	—	●	Without compression
DVI	Digital	—	—	Without compression

Problems	Checking Points	Checking components
1) Distorted picture or abnormal sound is heard during initialisation	a) Check SDRAM address, data bus, CLK and other control signals waveform	IC8051
	b) Check video signals	LB8301, R8321, R8322, LB8302, R8325, R8326
	c) Check audio DAC circuitry ***Compare the above with OK condition Module**	IC8421 ***Check for solder short and/or component missing/damaged**
2) No TOC/Long TOC	a) Check motor driver circuitry (voltages)	IC8251
	b) Check laser drive circuitry (voltages and current)	Q8550, Q8551, Q8552, Q8560, Q8561, Q8562
	c) Check LSI connection to motor drive circuitry ***Compare the above with OK condition Module**	IC8001 ***Check for solder short and/or component missing/damaged**
3) Disc not spinning 4) Traverse not moving	a) Check connection from Backend Module to Traverse unit	FP8201
5) Traverse and spindle abnormal movement	b) Check motor driver circuitry on voltages and control signals ***Compare the above with OK condition Module**	IC8251 ***Check for solder short and/or component damaged**
6) Cannot read disc but spindle is spinning	a) Check laser drive circuitry (voltages and current)	Q8550, Q8551, Q8552, Q8560, Q8561, Q8562
- Cannot read CD	- Check CD laser drive	Q8550, Q8560, Q8561, Q8562
- Cannot read DVD	- Check DVD laser drive ***Check voltages and LD current and compare with OK Module**	Q8550, Q8551, Q8552, Q8560 ***Check for solder short and/or component missing/damaged**
7) Block noise during play	a) Check SDRAM address and data bus signal ***Compare the above with OK condition Module**	IC8051 ***Check for solder short and/or component damaged**

Problems	Checking Points	Checking components
8) Jitter out of specification	a) Check LD current b) Check OPU (change to other unit and confirm)	OPU unit (FFC connection)

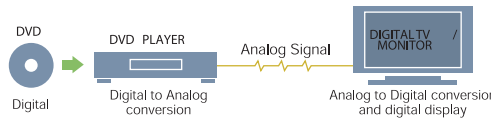
Problems	Checking Points	Checking components
1) TV does not have display. Set FL display shows U702 / U703.	1) Check setting of the set in Setup Menu whether HDMI video output is turned ON.	
	2) +5V supply to TV	IC3952 (Pin 4)
	3) HDMI Connector Solderbility condition	P3901
	4) HDMI Output TMDS signal lines - Data - Clock	 L3903, L3904, L3905 L3906
	5) HDMI Transmitter communication lines to TV - Data , SDA - Clock, SCL	 LB3905, R3905, Q3902, R3904 LB3904, R3907, Q3903, R3906
	6) HDMI Transmitter communication lines from LSI	RX3902
	7) Local Port Slave Address setting resistor	R3921
	8) HDMI Transmitter +3.3V supply	LB3901, L3901, L3902
	9) HDMI Transmitter +1.8V supply	IC3782 (Pin1), LB3902
	10) HDMI Up-con +3.3V supply	LB3701
	11) HDMI Pixel clock output from Up-Con to HDMI Transmitter	LB3702
	12) Up-Con IC I2C Data and Clock Line	RX3706
	13) Hot-Plug signal	LB3906, R3902, R3903, Q3901, D3901
	14) TMDS output swing amplitude control resistor	R3901
	15) Host Interface External Input Clock from LSI (IC8001) to Up-Con IC (IC3701)	LB8702
	16) Video data lines from LSI (IC8001) to Up-Converter (IC3701)	RX3707, RX3708, RX3701
2) When switching the video output mode from 480p to 720p / 1080i, the TV display becomes blank.	1) Supply for IC3701 up-conversion pin - Pins : 55, 57, 62, 67, 71, 75, 79	LB3703
3) Picture shown on TV not clear / sharp	1) Up-Converter (IC3701) Luminance output	RX3702
4) Colour Problem. TV Screen is White / Blue / Purple.	1) Up-Converter (IC3701) Component Y, Pb, Pr output	RX3703, RX3704, RX3705
5) HDMI got no audio output.	1) Audio Data Lines	RX8403, RX8402 ***Check for solder short and/or component missing/damaged as well as signal condition**

Compare HDMI connection with conventional analog connection, using the DVD player as an example. With an analog connection, the digital signal from the DVD player is converted to analog and sent to the TV, then converted back to digital and displayed. Inevitably, there is some loss of picture quality due to conversion errors and to noise and signal degradation that occurs as the signal travels through the cable.

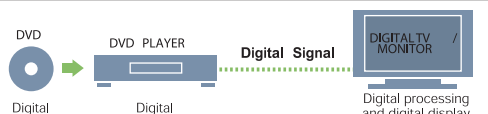
With HDMI, on the other hand, the DVD signal is transmitted to the TV in its original digital form. There is no conversion from digital to analog and back, and thus no quality loss from conversion errors. Image quality is thus higher. Plus, because HDMI supports 480p, 1080i, and up to 1080p high-definition images with copy protection, it produces images with quality that is ideal for large-screen viewing.

Video Signal Transmission – HDMI vs. Analog

Conventional Analog Connection



HDMI Connection



Monitors that Maximize HDMI's Advantages

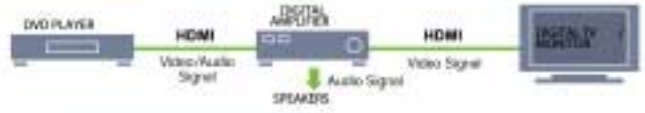
In plasma display panels, liquid crystal displays, and LCD projectors, the image processing and display systems are digital. When a set-top box or DVD player is connected to one of these monitors via HDMI, the signal processing is digital all the way from transmission to display, so the images are beautiful.

The super-high-quality linear PCM sound provided by DVD-Audio is not given its full potential when the digital signal is transmitted through an analog cable.

With a conventional analog connection, the digital signal carrying DVD-Audio's detailed audio data is converted to analog before being sent to the amplifier and output. Sound quality is diminished due to noise and signal degradation.

HDMI, on the other hand, transmits the signal in its original digital form, so the sound is extremely pure. HDMI also supports up to eight channels of multi-channel sound. Plus, it connects the player and amplifier with a single cable, rather than the multiple cables needed in conventional connection.

Connection Example



Player and amplifier are connected by a single cable. Connection is quick and easy, and there's no clutter.

It generally takes more than six cables to connect player and amplifier. Connection is more complicated, and there are more cables to get in the way.

Linked Control

Here's an example of how linked control will work among HDMI-compatible units in the future. When you insert a disc into the DVD player and press Play, the amplifier and TV automatically turn on too. You get the advantage of one-touch operating ease as well as superior picture and sound quality.

HDMI transmits both video and audio signals over a single cable, so connection is quick and easy and the area around the TV remains uncluttered. Also, when each of the connected units is HDMI-compatible, control signals can be exchanged among them. This means that, in the future, it will be possible to operate several units from a single remote control, or to operate several units via linked control.

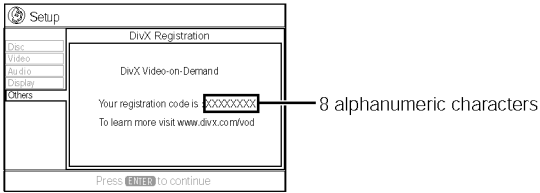
DivX Video-on-Demand (VOD) content is encrypted for copyright protection. In order to play DivX VOD content on this unit, you first need to register the unit.

Follow the online instructions for purchasing DivX VOD content to enter the unit's registration code and register the unit. For more information about DivX VOD, visit www.divx.com/vod.

Display the unit's registration code



- We recommend that you make a note of this code for future reference.
- After playing DivX VOD content for the first time, another registration code is then displayed in "DivX Registration". Do not use this registration code to purchase DivX VOD content. If you use this code to purchase DivX VOD content, and then play the content on this unit, you will no longer be able to play any content that you purchased using the previous code.
- If you purchase DivX VOD content using a registration code different from this unit's code, you will not be able to play this content. ("Authorization Error" is displayed.)

Regarding DivX content that can be only be played a set number of times

Some DivX VOD content can only be played a set number of times. When you play this content, the remaining number of plays is displayed. You cannot play this content when the number of remaining plays is zero. ("Rented Movie Expired" or "Rental Expired" is displayed.)

When playing this content

- The number of remaining plays is reduced by one if
  - you press [⏻] or press and hold [—SETUP].
  - you press [■ STOP]. (Press [❚❚ PAUSE] to pause play.)
  - you press [⏮, ⏭ SKIP] or [◀◀, ▶▶SLOW/SEARCH] etc. and arrive at another content or the start of the content being played.
- Resume and Marker functions do not work.

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Jitter check	Jitter check Jitter rate is measured and displayed. Measurement is repeatedly done in the cycle of one second. Read error counter starts from zero upon mode setting. When target block data failed to be read out, the counter advances by one increment. When the failure is caused by minor error, it may be corrected when retried to enable successful reading. In this case, the counter advances by one. When the error persists even after retry, the counter may jump by two or more.	 Jitter rate is shown in decimal notation to one place of decimal. Focus drive value is shown in hexadecimal notation.	In STOP (no disc) mode, press STOP button on the player, and "5" button on the remote control unit. Press STOP or OPEN button to exit. Press "FL Display" on remote control unit for next page (FL Display).
Error code check	Error code check The latest error code stored in the EEPROM IC is displayed.	 Error code (play_err) is expressed in the following convention. Error code = 0 x DAXX is expressed: DVDnn UXX Error code = 0 x DBXX is expressed: → DVDnn HXX Error code = 0 x DXXX is expressed: → DVDnn FXXX Error code = 0 x 0000 is expressed: → DVDnn F--- * "xx" denotes the error code →	In STOP (no disc) mode, press STOP button on the player, and "0" button on the remote control unit. * With pointing of cursor up and down on display. Cancelled automatically 5 seconds later. To exit, press [POWER] button on main unit or remote control.
Initial setting of laser drive current	Initial setting of laser drive current. Initial current value for each of DVD laser and CD laser is separately saved in the EEPROM IC.	 The value denotes the current in decimal notation. The above example shows the initial current is 34mA and 28mA for DVD laser and CD laser respectively when the laser is switched on.	In STOP (no disc) mode, press STOP button on the player, and PAUSE button on the remote control unit. Cancelled automatically 5 seconds later. Press "FL Display" on remote control unit for next page (FL Display) on values of laser drive current.
DVD laser drive current measurement	DVD laser drive current measurement ·DVD laser drive current is measured and the result is displayed together with the initial value stored in the EEPROM IC. After the measurement, DVD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	 The value denotes the current in decimal notation. The above example shows the initial current is 34mA and the measured value is 32mA.	In STOP (no disc) mode, press STOP button on the player, and FUNCTIONS button on the remote control unit. Cancelled automatically 5 seconds later. Press "FL Display" on remote control unit for next page (FL Display) on values of dvd drive current.
ADSC internal RAM data check	ADSC internal RAM data check ·ADSC internal RAM data is read out and displayed.	 The value is shown in hexadecimal notation. The above example shows the data in ADSC address OFAh is 6901h.	In STOP (no disc) mode, press STOP button on the player, and "1" button on the remote control unit. Press STOP or PLAY button.
CD laser drive current measurement	CD laser drive current measurement CD laser drive current is measured and the result is displayed together with the initial value stored in the EEPROM IC. After the measurement, CD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	 The value denotes the current in decimal notation. The above example shows the initial current is 28mA and the measured value is 26mA.	In STOP (no disc) mode, press STOP button on the player, and "3" button on the remote control unit. Cancelled automatically 5 seconds later. Press "FL Display" on remote control unit for next page. (FL Display)

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Timer 1 check	Timer 1 check Laser operation timer Operation time is measured separately for DVD laser and CD laser. Press "FL Display" button for next page of FL Display	 Shown to the left is DVD laser time, and to the right CD laser time. Time is shown in 4 digits of decimal notation in a unit of 10 hours. "0000" will follow "9999".	In STOP (no disc) mode, press STOP button on the player, and "▲" button on the remote control unit. Cancelled automatically 5 seconds later.
Timer 1 reset	Timer 1 reset Laser operation timer Operation time of both DVD laser and CD laser is reset all at once.	T1_0000/0000 (display1/display2)	While displaying Timer 1 data, press STOP button on the player, and "▼" button on the remote control unit. Cancelled automatically 5 seconds later.
Timer 2 check	Timer 2 check Spindle motor operation timer Press "FL Display" button for next page of FL Display	 Time is shown in 5 digits of decimal notation in a unit of 10 hours. "00000" will follow "99999".	In STOP (no disc) mode, press STOP button on the player, and "▶" button on the remote control unit. Cancelled automatically 5 seconds later.
Timer 2 reset	Timer 2 reset Spindle motor operation timer Press "FL Display" button for next page of FL Display	T2_00000	While displaying Timer 2 data, press STOP button on the player, and "◀" button on the remote control unit. Cancelled automatically 5 seconds later.

Tips for making data discs

When there are more than 8 groups, the eighth group onwards will be displayed on one vertical line in the menu screen.

There may be differences in the display order on the menu screen and computer screen.

This unit cannot play files recorded using packet write.

DVD-RAM

Discs must conform to UDF 2.0.

DVD-R/RW

Discs must conform to UDF bridge (UDF 1.02/ISO9660).

This unit does not support multi-session. Only the default session is played.

CD-R/RW

Discs must conform to ISO9660 level 1 or 2 (except for extended formats).

This unit supports multi-session but if there are many sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.

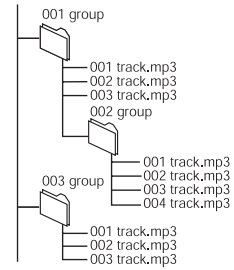
Naming folders and files

(Files are treated as contents and folders are treated as groups on this unit.)

At the time of recording, prefix folder and file names. This should be with numbers that have an equal number of digits, and should be done in the order you want to play them (this may not work at times).

Files must have the extension.

e.g. [MP3]



[WMA] (Extension: ".WMA" or ".wma")

Compatible compression rate: between 48 kbps and 320 kbps

You cannot play WMA files that are copy-protected.

This unit does not support Multiple Bit Rate (MBR).

[MP3] (Extension: ".MP3" or ".mp3")

Compatible compression rate: between 32 kbps and 320 kbps

This unit does not support ID3 tags.

Compatible sampling rates:

– DVD-RAM, DVD-R/RW: 11.02, 12, 22.05, 24, 44.1 and 48 kHz

– CD-R/RW: 8, 11.02, 12, 16, 22.05, 24, 32, 44.1 and 48 kHz

[JPEG] (Extension: ".JPG", ".jpg", ".JPEG" or ".jpeg")

JPEG files taken on a digital camera that conform to DCF Standard (Design rule for Camera File system) Version 1.0 are displayed. Files that have been altered, edited or saved with computer picture editing software may not be displayed.

This unit cannot display moving pictures, MOTION JPEG and other such formats, and still pictures other than JPEG (e.g. TIFF), or play pictures with attached audio.

[MPEG4] (Extension: ".ASF" or ".asf")

You can play MPEG4 data [conforming to SD VIDEO specifications (ASF standard)/MPEG4 (Simple Profile) video system/G.726 audio system] recorded with Panasonic SD multi cameras or DVD video recorders with this unit.

The recording date may differ from that of the actual date.

[DivX] (Extension: ".DIVX", ".divx", ".AVI" or ".avi")

You can play all versions of DivX® video (including DivX®6) [DivX video system/MP3, Dolby Digital or MPEG audio system] with standard playback of DivX® media files. Functions added with DivX Ultra are not supported.

GMC (Global Motion Compensation) is not supported.

DivX files greater than 2 GB or have no index may not be played properly on this unit.

This unit supports all resolutions up to maximum of 720 k 480 (NTSC)/720 k 576 (PAL).

You can select up to 8 types of audio and subtitles on this unit.

To improve picture quality, you can change the video signal output from the SCART (AV) terminal.

- Select "RGB/No Output" (RGB only) from QUICK SETUP.
- Set "Video Output" to "Off". (Refer to O.I. page 32, "HDMI" menu.)
- This connection will also enable you to play audio from your television through your home theater system. Refer to "Operating other equipment" (O.I. page 39)
- Do not use the HDMI cable when you use the scart cable for the connection.

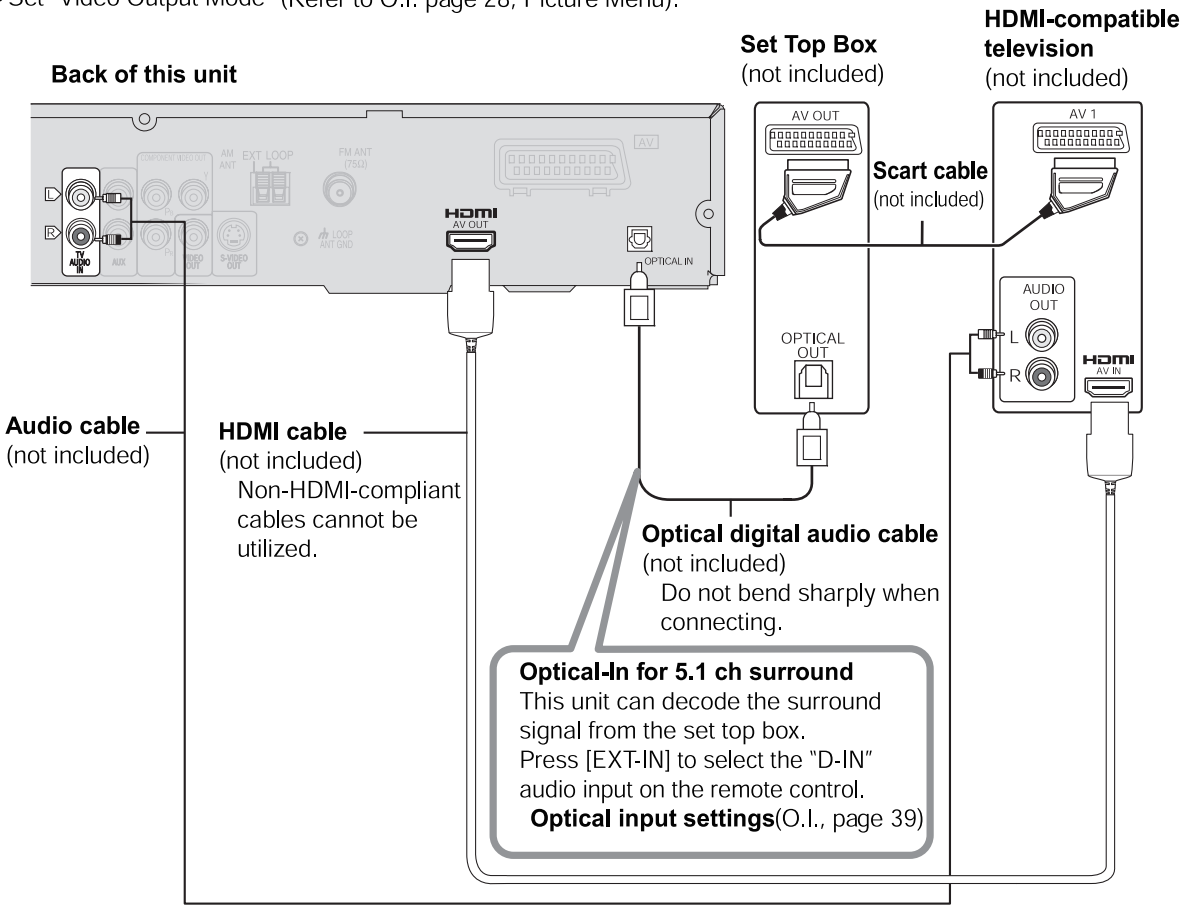
Sound from the television
Press [EXT-IN] to select the "TV" audio input on the remote control (O.I. page 39)
Scart cable (not included)
Optical digital audio cable (not included)
Do not bend sharply when connecting.
Optical-In for 5.1 ch surround
This unit can decode the surround signal from the set top box.
Press [EXT-IN] to select the "D-IN" audio input on the remote control.
Optical input settings (O.I. page 39)
Scart cable (not included)
To listen to the sound from the television, select the appropriate audio out (e.g., Monitor) on the television.

HDMI is a next-generation digital interface for consumer electronic products.
Unlike conventional connections, it transmits uncompressed digital video and audio signals on a single cable. This unit supports high-definition video output (720p, 1080i) from the HDMI AV OUT terminal.

- Do not use the scart cable when you use the HDMI cable for the connection.
- Do not connect any kind of audio/video distribution devices between this unit and the television (such as an amplifier, etc.).
- Set "Video Output" to "On" and "Audio Output" to "On" (Refer to O.I.page 32, "HDMI" menu).
- Set "Video Output Mode" (Refer to O.I. page 28, Picture Menu).

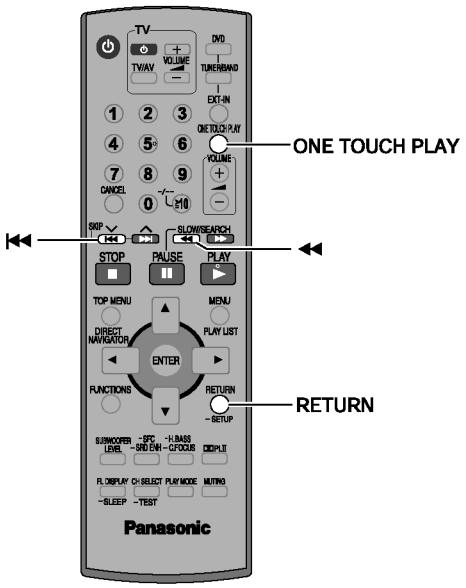


■ *HDAVI Control function*

If your Panasonic television is an HDMI control compatible television, you can operate your television synchronizing with home-theater operations or vice versa.

- It is recommended that you use Panasonic's HDMI cable.
  [Recommended part number: RP-CDHG15 (1.5 m), RP-CDHG30 (3.0 m), RP-CDHG50 (5.0 m), etc.]
- Non-HDMI-compliant cables cannot be utilized.

Operating both the television and the home theater system: Control with HDMI (HDAVI Control)



What is HDAVI Control?

HDAVI Control is a convenient function that offers linked operation of this unit and Panasonic TV (VIERA) with HDAVI Control. You can use this function by connecting the equipment with the HDMI cable. For operational details, see the operating instructions of the connected equipment.

Preparation

- Confirm that the HDMI connection (O.I. page 11) has been made.
  Confirm that the scart cable is **not** connected.
- Set "Control with HDMI" (HDAVI Control) to "On"
- (Refer to O.I. page 32, "HDMI" menu).
- To complete and activate the connection correctly, turn on all HDAVI Control compatible equipment and select the input channel corresponding to the home theater on the television.

- Whenever the connection or settings are changed, reconfirm the points above.
- When you turn off this unit, TV selector changes to TV tuner.

One Touch Play

You can turn on this unit and television, and start playing the disc in the play position with a single press of a button.

Press [ONE TOUCH PLAY].

[Note]

Playback may not be immediately displayed on the television. If you miss the beginning portion of playback, press [I◄◄] or [◄◄] to go back to where playback started.

Automatic input switching

When the following operations are performed the television will automatically switch the input channel and display the corresponding action. Also, the speakers automatically switch to this unit's speakers.

- When play starts on the unit
- When an action that uses the display screen is performed (e.g., Direct Navigator screen)

Theatre speaker

You can select whether audio is output from the home theater system or the television by using the television settings. For details, refer to the operating instructions of your television.

Home theatre

Theatre speakers are active.

- The television speakers are automatically muted.
- You can control the volume setting using the volume or mute button on the television remote control. (The volume level is displayed on this unit's FL display.)
- If you turn off the home theater system, speakers automatically switch to the television.

TV speakers

Television speakers are active.

- The volume of the home theater system is set to "0".
- Audio output is 2-channel audio.

- To cancel muting, you can also use the home theater remote control (Refer to O.I.page 38, Muting the sound).
- When switching between the home theater system and television speakers, the TV screen may be blank for several seconds.
- You can set whether the main unit will automatically switch to "TV" or "D-IN" by pressing and holding [RETURN] while the main unit is in "TV" or "D-IN" mode respectively.

Power off link

When the television is turned off, the home theater system goes into standby mode automatically.

- This function works only when "DVD/CD", "TV"* or "D-IN"* is selected as the source on the home theater system.
- When the television is turned on, the home theater system does not turn on automatically.
  (Power on link is not available.)

*Depending on the function setting you made above, "TV" or "D-IN", Power off link works only when:

- The function is set to "TV", and "TV" is selected as the source.
- The function is set to "D-IN", and "D-IN" is selected as the source.

Using the Music Port

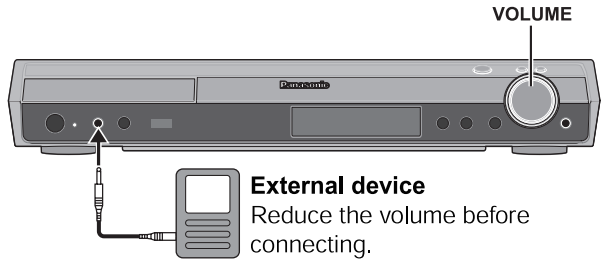
The Music Port allows you to connect and enjoy music from an external device (e.g. MP3 player) through your home theater system.

Preparation

To avoid distorted sound, make sure that any equalizer function of your external device is turned off.

1 Reduce the volume and connect the external device (not included).

Plug type: ∅3.5 mm stereo mini plug



External device
Reduce the volume before connecting.

2 Press [EXT-IN] to select "MUSIC P.".

(Settings can be confirmed on the display or the television screen.)

MUSIC P. → TV → AUX
↑ D-IN (Digital In) ←

e.g. Display

3 Adjust the external device volume to a normal listening level, and then adjust the volume of this unit with [VOLUME].

You can enjoy surround sound when you turn on Sound Field Control (MOVIE, SPORT or MUSIC)

■ Discs that can be played

DVD VIDEO DVD VIDEO	**DVD-Video** DVD-V —
DVD AUDIO	**DVD-Audio** DVD-A DVD-V ● DVD-V Some DVD-Audio discs contain DVD-Video content.
COMPACT disc DIGITAL VIDEO COMPACT disc SUPER VIDEO	**Video CD** VCD ● Including SVCD (Conforming to IEC62107).
DVD RAM RAM4.7	**DVD-RAM** DVD-VR MP3 JPEG MPEG4 DivX ※1 ● DVD-VR Recorded with devices using Version 1.1 of the Video Recording Format (a unified video recording standard), such as DVD video recorders, DVD video cameras, personal computers, etc. ● JPEG Recorded with Panasonic SD multi cameras or DVD video recorders using the DCF (Design rule for Camera File System) Standard Version 1.0. ● MPEG4 Recorded with Panasonic SD multi cameras or DVD video recorders [conforming to SD VIDEO specifications (ASF standard)/MPEG4 (Simple Profile) video system/G.726 audio system].
DVD R R4.7 DVD RW DVD R R DL	**DVD-R (DVD-Video)**※2**/DVD-RW (DVD-Video)** DVD-V ● Discs recorded and finalized※3 on DVD video recorders or DVD video cameras. **DVD-R (VR)**※2**/DVD-RW (VR)** DVD-VR ● Discs recorded and finalized※3 on DVD video recorders or DVD video cameras using Version 1.1 (or 1.2 DVD-R DL only) of the Video Recording Format (a unified video recording standard). **DVD-R/DVD-RW** MP3 JPEG MPEG4 DivX ※1 ● Finalize※3 the disc after recording.
—	**+R (Video)**※2**/+RW (Video)** DVD-V ● Discs recorded and finalized※3 on DVD video recorders or DVD video cameras.
COMPACT disc DIGITAL AUDIO COMPACT disc DIGITAL AUDIO TEXT	**CD** CD WMA MP3 JPEG VCD MPEG4 DivX ※1 ● This unit can play CD-R/RW recorded with the above formats. Close the sessions or finalize※3 the disc after recording. ● CD This unit is compatible with HDCD, but does not support the Peak Extend function (a function which expands the dynamic range of high-level signals). HDCD-encoded CDs sound better because they are encoded with 20 bits, as compared with 16 bits for all other CDs. ● WMA MP3 JPEG This unit also plays HighMAT discs. ● WMA This unit does not support Multiple Bit Rate (MBR: an encoding process for audio content that produces an audio file encoded at several different bit rates).

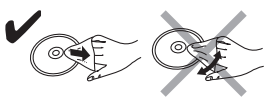
※1 Functions added with DivX Ultra are not supported.
※2 Includes single-sided, dual-layer discs.
※3 A process that allows play on compatible equipment.
● It may not be possible to play all the above-mentioned discs in some cases due to the type of disc or condition of the recording.

■ Discs that cannot be played

DVD-RW version 1.0, DVD-ROM, CD-ROM, CDV, CD-G, SACD, DivX Video Discs and Photo CD, DVD-RAM that cannot be removed from their cartridge, 2.6-GB and 5.2-GB DVD-RAM, and "Chaoji VCD" available on the market including CVD, DVCD and SVCD that do not conform to IEC62107.

■ To clean discs

Wipe with a damp cloth and then wipe dry.



■ Disc handling precautions

- Do not attach labels or stickers to discs. This may cause disc warping, rendering it unusable.
- Do not write on the label side with a ball-point pen or other writing instrument.
- Do not use record cleaning sprays, benzine, thinner, liquids which prevent static electricity, or any other solvent.
- Do not use scratch-proof protectors or covers.
- Do not use the following discs:
  - – Discs with exposed adhesive from removed stickers or labels (rented discs, etc).
  - – Discs that are badly warped or cracked.
  - – Irregularly shaped discs, such as heart shapes.

■ Video systems

- This unit can play PAL and NTSC, but your television must match the system used on the disc.
- PAL discs cannot be correctly viewed on an NTSC television.
- This unit can convert NTSC signals to PAL 60 for viewing on a PAL television.

■ Clean this unit with a soft, dry cloth.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, carefully read the instructions that came with the cloth.

Do not use commercially available lens cleaners as they may cause malfunction. Cleaning of the lens is generally not neccessary although this depends on the operating environment.

Before moving the unit, ensure the disc trays are empty.
Failure to do so will risk severely damaging the disc and the unit.

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Micro-processor firmware version display & EEPROM checksum display.	Micro-processor firmware version display & EEPROM checksum display. EEPROM checksum is only available due to existence of EEPROM IC. (NO: NO EEPROM IC)		In STOP (no disc) mode, press STOP button on the player, and "7" button on the remote control unit. Cancelled automatically 5 seconds later. Press "FL Display" button on remote control unit for next page. (FL Display)
Initialization	Initialization User settings are cancelled and player is initialized to factory setting.		In STOP (no disc) mode, press STOP button on the player , and ≧10 button on the remote control unit.
Region display	Region display & mode		In STOP (no disc) mode, press STOP button on the player, and "6" button on the remote control unit. Cancelled automatically 5 seconds later.
DVD module firmware version display	DVD module firmware version is displayed on the FL Display.		In STOP (no disc) mode, press STOP button on the player, and "8" button on the remote control unit. Cancelled automatically 5 seconds later.
Communication error display	Displays frequency of communication errors between system control IC and mechanism control IC during DVD module.		In STOP (no disc) mode, press STOP button on the player, and "MENU" button on the remote control unit. Cancelled automatically 5 seconds later.
DVD Module Reset	To reset DVD Module.		While in initialization mode, press & hold STOP button on player, follow by "ENTER" button on the remote control unit. Cancelled automatically 5 seconds later.
